# **REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS**

# **MAY 2008**

#### **OVERVIEW**

Global growth continued to lose momentum in the first quarter of 2008, as the financial turmoil stemming from the United States (US) sub-prime mortgage crisis and high commodity prices weighed on the world economy. In the developed economies, growth moderated, with the US economy expanding by 2.5 per cent and the 15-nation euro-zone by 2.2 per cent in the twelve months to March 2008. Japan's economy also performed sluggishly, growing by a mere 1.3 per cent. In developing economies, growth, while still robust softened in the first

quarter of 2008. The economies of China and India grew at slightly lower rates of 10.6 per cent and 8.8 cent, respectively. per Growth in the tourism dependent economies of the Caribbean region was

expected to slow as the global economy contracts. In the first quarter of 2008, the Barbados economy grew by an estimated 2.4 per cent, while growth in Jamaica is estimated to range between 1 per cent and 1.5 per cent.

domestic

of 2008.

Against this international background, growth in the domestic economy also moderated in the first quarter of 2008, as real GDP increased by 1.6 per cent compared with 6.5 per cent in the first quarter of 2007. Real value added in the energy sector contracted by 0.7 per cent, mainly on account of declines in crude oil, LNG and fertilizer production. In contrast, the non-energy sector performed well and was the main driver of economic activity, with real value added in the sector expanding by 1.3 per cent. Strong growth occurred in Government (14.3 per cent), Construction (9.3 per cent) Transportation Storage and Communication (8.7 per cent), Water and Electricity (8.7 per cent) and Distribution (5.2 per cent).

Labour market conditions remained tight due to heightened economic activity in the first quarter of 2008. The unemployment rate fell to 5.3 per cent compared with 6.5 per cent in the corresponding period one year earlier as more persons were employed in the Construction, Transportation and the Community, Social and Personal Services sectors.

The domestic economy continued to be challenged bv strong inflationary pressures. On a year-on-year basis to May 2008, the Index of Retail Prices (RPI)

rose by 10 per compared with 7.9 per cent Against this international for the corresponding period background growth in the in 2007. Food prices, the economy also main driver of inflation, rose moderated in the first quarter by 21.8 per cent year-onyear to May 2008. The major contributors to food inflation

> were increases in the prices of Bread and Cereals (35.1 per cent), Fruit (22.6 per cent), Oils and Fats (20.2 per cent), Fish (25.4 per cent) and Milk, Cheese and Eggs (25.8 per cent). The sharp rise in the price of domestic cereals was influenced by increases in the price of flour and rice in global markets. Meanwhile, core inflation, which excludes food prices, was estimated at 5.2 per cent, compared with 4.5 per cent one year ago.

> In light of strong inflationary pressures, Central Bank maintained the its aggressive monetary policy stance in the first five months of the year. In February 2008, the Bank raised the repo-rate by 25 basis points to 8.25 per cent, the first increase since September 2006 and, simultaneously, increased the reserve requirement ratio applicable to commercial banks to 13 per cent. Prior to this, the ratio had remained unchanged at 11 per cent since June 2004. During the period January to May 2008, the Bank also issued through net open market

operations, treasury bills and notes amounting to \$2,769.5 million and withdrew \$2,465.6 million, through the sale of foreign exchange. As a result of these measures, liquidity during the review period was relatively contained, with commercial banks' excess reserves averaging \$258 million. Nevertheless. net fiscal injections, which has been one of the primary sources of liquidity, remained a challenge. Net fiscal injections amounted to \$4,475.4 million in the first five months of the year compared with \$3,434.1 million in the corresponding period one year ago.

The relatively tight liquidity conditions and the increase in the repo rate in February 2008 led to a general rise in short-term money market rates. The inter-bank rate moved to an average of 7.39 per cent in May 2008 from 7.24 per cent in December 2007 and 7.18 per cent in May 2007. Treasury bill rates also trended upwards, with the three-month Treasury bill rate increasing to 7.04 per cent in May 2008 from 7 per cent in December 2007 and 6.83 per cent in May 2007. Further, longer-term interest rates rose during the period, with commercial banks' prime lending rate increasing to 12.25 per cent in March 2008 from 11.75 per cent. In addition, the banks' weighted average lending rate climbed to 10.96 per cent in March 2008 from 10.68 per cent in December. Meanwhile, the weighted average deposit rate increased to 2.96 per cent in March 2008 from 2.76 per cent in December.

Despite higher interest rates, private sector credit extended by the consolidated financial sector grew apace. On a yearon-year basis to May 2008, credit granted by the consolidated financial system rose by 18.8 per cent. Commercial banks were the main contributors to this increase as bank credit to the private sector accelerated to 24.6 per cent as a result of strong growth in consumer credit (19.4 per cent), real estate mortgage loans (28.8 per cent) and business lending (23.1 per cent).

In the first half of the fiscal year (October 2007 to March 2008), the central government recorded an overall surplus of \$2,022.9 million, compared with \$1,621.6 million in the corresponding period one

year ago. Total revenue grew by 36.1 per cent to \$21,854.3 million, with oil receipts contributing \$11,446.4 million. Central government expenditures also expanded to \$19,831.4 million in the first half of the current fiscal year, exceeding the amount in the comparable period in fiscal 2007 by \$4,483 million. While there was a general rise in all the major categories of expenditure, there were sharp increases in transfers and subsidies, wages and capital salaries and expenditures. the non-oil fiscal deficit Moreover. amounted to \$9,423.5 million during the period. Buoyant oil prices resulted in further deposits to the Heritage and Stabilization Fund (HSF) with the balance in the Fund growing to \$12,475.9 million at the end of May 2008.

Preliminary data suggested that the balance of payments surplus amounted to US\$663.1 million in the first quarter of 2008. This was attributed to high global energy prices, which ensured favourable earnings on Trinidad and Tobago's main export commodities. At the end of May 2008, gross official reserves (excluding the HSF) stood at US\$7,407.5 million, representing 9.7 months of import cover.

#### OUTLOOK

The turbulence arising from the US subprime mortgage crisis has dampened the outlook for global growth in 2008. Contagion effects stemming from the US have impacted both developed and developing countries. Global growth is expected to slow to 3.7 per cent in 2008 from 4.9 per cent in 2007. The global economy also faces strong inflationary pressures, stemming particularly from surging food and fuel prices. Despite the anticipated slowdown in global economic activity, Trinidad and Tobago's growth prospects for 2008 remain positive. However, following growth of 5.5 per cent in 2007, the economy is expected to expand at a slower pace in 2008.

With no major projects in train, growth in the energy sector is expected to moderate in 2008. However, the non-energy sector is expected to be the major engine of growth, as output in sub-sectors such as transport, construction and distribution continue to grow. The labour market will remain relatively tight in 2008, following the record low unemployment rate of 4.5 per cent in the final quarter of 2007. The non-energy sector, in particular the Construction sector, is expected to maintain its strong demand for both skilled and non-skilled workers.

Inflationary pressures will pose a challenge for policy makers in 2008 and would require prudent macro-economic management. In the first half of the year, the Central Bank of Trinidad and Tobago implemented a number of measures aimed at tightening monetary policy. The Bank will continue its restrictive monetary stance to dampen credit demand and keep inflation in check.

#### **GROSS DOMESTIC PRODUCT**

The Trinidad and Tobago economy grew by 1.6 per cent in the first quarter of 2008 when compared to the corresponding period of 2007. While the energy sector experienced a moderate contraction, the non-energy sector returned a positive performance and was the main driver of economic activity.

Real value added in the energy sector decreased by 0.7 per cent in the first quarter of 2008. This decline reflected a deterioration in the production of crude oil and LNG. The reduction in crude oil was due largely to lower output from maturing oil fields while technical difficulties at the Atlantic Train IV facility resulted in lower LNG production. In contrast, the Petrochemicals sub-sector realized positive growth of 1.0 per cent, as the fall-off in ammonia production was offset by a strong surge in methanol The decline in ammonia production. resulted from the temporary closure of some plants that were affected by mechanical problems and industrial unrest.

During the first quarter of 2008, real value added in the non-energy sector increased by 1.3 per cent. The Government sector, led the way with an increase of 14.3 per cent. Whilst the Construction Industry grew by 9.3 per cent as work proceeded on the Methanol Holdings Trinidad Limited ammonia-ureamelamine complex and a hosts of government projects such as the POS Water Front Project, the Government Campus and the Highway Interchange. The Transport, Storage and Communications sector accelerated by 8.7 per cent due to heightened activity in air, land and sea transportation. The airline industry expanded its network, schedule and fleet amidst growing demand, while the Port strengthened its handling capacity through efficiency improvements and additional equipment. Telecommunications activity also increased.

With respect to the Electricity and Water sector, output rose by 8.7 per cent as electricity generation capacity grew to meet the greater demands from industries and households. Further, Distribution activity expanded by 5.2 per cent mainly on account of higher retail activity. The other services sector was higher by 1.6 per cent primarily because of the increase in accommodation capacity with the opening of additional hotels. Meanwhile, slower growth occurred in Manufacturing (0.5 per cent), Finance, Insurance and Real Estate (0.6 per cent).

On the downside, Agricultural output fell by 13.5 per cent as farmers continued to be plagued by rising costs, labour and raw material shortages, poor access roads and drainage and praedial larceny. In addition, sugar cane production came to an end in 2007.

#### **DOMESTIC PRODUCTION**

#### Petroleum

#### **Exploration Activity**

The Ryder Scott report suggested that the pace of exploration activity will have to quicken in the future in order to sustain and enhance current production levels. However, the upstream sector has been affected by the rising costs of materials and equipment such as rigs. Also, the non-availability of labour poses an ongoing challenge. Nevertheless, during the first quarter of 2008, there was a rise in footage notable drilled. Exploration activity (as measured by total depth drilled) totalled 51.2 thousand meters, which was an increase of 17.6 per cent from the fourth quarter of 2007. The majority of the drilling (71.3 per cent) was developmental in nature as opposed to pure exploratory. Almost 50 per cent of the drilling activity was attributable to BPTT and New Horizons Exploration Trinidad and Tobago (NHETT). NHETT was also responsible for half of the 36 wells spudded during the quarter. The number of rig days fell off by 1.1 per cent and 9.7 per cent from the previous quarter and first quarter of 2007, respectively to average 273.3 days.

#### **Production and Exports**

Trinidad and Tobago is a mature oil province as production dates back more than 100 years. While the trend of declining production has generally been on account of maturing oil reservoirs, recently, most of the reduction in crude oil production has been attributable to disruptions at BHP Billiton. Since commencing production in 2005, BHP Billiton has been challenged persistently by the complex geology of the Angostura reservoir. Hence, crude oil production continued its downward trend during the first quarter of 2008, despite there being no major reports of disruptions to supplies. Crude oil production averaged 118.2 thousand barrels per day (b/d), which was an increase of 3.0 per cent from the previous quarter, but a decline of 5.0 per cent from the corresponding quarter of 2007.

Crude oil exports totalled 5.1 million barrels, a reduction of 10.3 per cent from the fourth quarter of 2007 and a fall of 0.6 per cent from the same quarter a year earlier.

#### Refining

Refinery throughput averaged 157 thousand b/d (a total of 14.3 million barrels) in the first quarter of 2008, an improvement of 7.0 per cent from the previous quarter and one of 4.3 per cent from the same quarter a year ago. In order to maintain optimum capacity utilization, local oil production is supplemented with imports. Generally, when crude oil production falls, oil imports tend to rise. Crude oil imports rose to 8.7 million barrels which represented an increase of 7.8 per cent from the fourth quarter of 2007, but a slight fall of 0.6 per cent from the corresponding quarter a year earlier.

#### Natural Gas

During the review period, natural gas production averaged 4,062 million cubic feet per day (mmcf/d), representing a decline of 3.1 per cent from the previous quarter, but an increase of 0.3 per cent when compared with the same period in 2007. Natural gas utilization was also lower, averaging 3,673.8 mmcf/d or 3.5 per cent below the previous quarter and 2.7 per cent less when compared to the corresponding quarter last year. These minor changes can be attributed to the loss in output that occurs during transmission of the gas. LNG production accounted for the majority of gas utilization (57.9 per cent), followed by the petrochemical industry (29.4 per cent) and power generation (7.2 per cent).

#### Liquefied Natural Gas

LNG production totalled 7,976.4 thousand cubic meters (m<sup>3</sup>) in the first quarter of 2008. This corresponded to a

decrease of 5.7 per cent in production from the last guarter and a year-on-year decline of 1.6 per cent. LNG exports followed a similar trend, declining by 5.9 per cent from the previous quarter to The fall-off in 7,462.5 thousand  $m^3$ . output and exports was due mainly to a slowdown in production from Train 4, which operated below full capacity for most of the quarter. As markets for LNG become more globalized the exports from Trains 1-3 continued to show increased diversification among destinations. Over the period, LNG was sold to the following markets: United States (42.6 per cent); Spain (26.0 per cent); Japan (10.6 per cent); Korea (9.7 per cent); Mexico (7.6 per cent); Puerto Rico (5.8 per cent) and India (2.6 per cent).

#### Natural Gas Liquids (NGLs)

The NGLs industry contracted somewhat from in the last period. This was on account of a significant loss of butane production (18.8 per cent) and a reduction in the export of natural gasoline (29.0 per cent) as a result of lower output from Train 4. Production of NGLs totalled 2,842.7 thousand barrels for the first three months of the year. This equated to a decline of 6.8 per cent from the last period and 10.0 per cent from the corresponding period of 2007. When compared to the previous quarter, exports of NGLs declined by 4.7 per cent to 2,967.8 thousand barrels. However, this represented a marginal increase (1.5 per cent) when compared to the same period in 2007.

Similarly, NGLs prices were weaker in the first quarter as the average price of propane fell by 3.0 per cent from the fourth quarter of 2007 to US\$63.07/bbl, while butane prices decreased by 8.9 per cent to US\$73.57/bbl. However, when compared to the similar three-month period last year, propane and butane prices rose by 47.6 per cent and 78.8 per cent, respectively. Conversely, the average trading price of natural gasoline rose by 1.7 per cent to US\$80.29/bbl when compared to the fourth quarter of 2007 and 62.4 per cent when compared to the corresponding period in 2007.

#### Box 1

#### Industry Developments

#### Petroleum

- The Ministry of Energy announced that five blocks would be put on auction sometime during the third quarter of 2008. These blocks include: (i) Block 5d, located off the south-east coast; (ii) Block 4b, located further out on the east coast; (iii) North Coast Marine Area (NCMA) 3; NCMA 4 and; NCMA 5. In April, a seismic was scheduled to be shot in order to garner additional information for proposed bidders on the hydrocarbon potential of the acreage. The Ministry also indicated that, after having received only one offer in the 2006 bid round, the Trinidad Deep Atlantic Area will return to the market in 2009. (Source: Energy Caribbean)
- Negotiations for some of the blocks awarded in the 2006 are still ongoing but should be completed before the commencement of the 2008 bid round.
- Block 2ab, which was awarded to Tullow Oil and Centrica, should have been signed-off in April.
- The Central Range Shallow and the Central Range Deep blocks on land (awarded to Canada's Petro Andina Resources) are in a similar position.
- > There are still a few outstanding issues with the Guayaguayare Shallow and Deep blocks, for which Tullow Oil was the only successful bidder.
- Having submitted exact bids for the NCMA 2 block, both ONGC/Mittal and Centrica were advised to improve their bids.
- Negotiations with Trinidad Exploration and Development (TED) are continuing for the South West Peninsula Shallow and Deep blocks.
- Norway's Statoil Hydro was sent a draft Production Sharing Contract for consideration after being the only bidder for TDAA block 5.
- Talisman Energy has ceased exploratory drilling in the Eastern block after the Zaboca 1 and the Shadon Beni 1 wells failed to discover commercial hydrocarbons.

#### Natural Gas

- The Government of Trinidad and Tobago awarded two new Production Sharing Contracts (PSCs). The first was awarded to a joint venture between Petrotrin and Canada-based Voyager Energy Limited to explore and develop the Central Range Shallow Horizon as well as the Central Range Deep Horizon onshore blocks. The other PSC was awarded to Norwegian-based Statoil ASA for the exploration and development of Trinidad Deep Atlantic Area (TDAA) 5.
- Cabinet decided to sell 80 per cent of the State's shareholding in Trintomar to EOG Resources at a cost of US\$20 million. This decision was taken due to the close proximity to the acreage already operated by EOG Recourses. Moreover, it is anticipated that this will enhance exploration and production given the enhanced capabilities of EOG Resources.
- Partners Canadian Superior Energy Incorporated, Challenger Energy Corporation and BG International Limited reported a natural gas discovery off the east coast of Trinidad in the Intrepid 5(c) block. The discovery in the Victory well has an estimated flow rate exceeding 100 mmcf/d. A detailed reserve analysis is underway.
- Petro-Canada reported a natural gas find, 14 miles off Tobago's northwest coast. There was an estimated 0.6 to 1.3 tcf of contingent resources, but further appraisal activity is required before the reserve base can be finalized.
- The government has proposed to host a bid round in the third quarter of 2008. A total of 5 blocks will be put on offer in an effort to increase exploration activity. These blocks are 5d, 4b, North Coast Marine Area (NCMA) 3, NCMA 4 and NCMA 5.
- T&TEC has contracted Finland's Wartsila Corporation to construct a 64 megawatt gas-fired power plant in Tobago at a cost of US\$77 million. The plant will be the first natural gas reciprocating engine plant of its kind in the Caribbean.

#### PETROCHEMICALS

#### Ammonia

Production of ammonia totalled 1,218.8 thousand tonnes in the first quarter of 2008, a decline of 4.1 per cent from production levels recorded in the previous quarter and 6.5 per cent from the corresponding period in 2007. This fall in ammonia production occurred as a result of industrial action which forced the temporary closure of the Yara plant in January, as well as the scheduled turnaround (in addition to some mechanical problems) of a few plants at PCS Nitrogen. Also, exports of ammonia decreased to 1,122.6 thousand tonnes. This corresponds to a 10.5 per cent fall from the last period and 8.5 per cent drop from the same period last year.

#### Urea

Following a marked decrease in urea production in the fourth quarter of 2007, production increased by 16.5 per cent to a total of 182.9 thousand tonnes over the first three months of 2008. Conversely, exports of urea continued its downward trend, declining by 8.5 per cent from the last period to reach 160.4 thousand tonnes. The deterioration in exports resulted mainly from low demand in the US market. On a year-on-year basis, both production and exports declined, with production falling by 1.5 per cent and exports by 11.0 per cent.

#### Methanol

In the first three months of 2008, methanol production totalled 1,493.2 thousand tonnes. This corresponded to a decrease of 2.0 per cent from the previous period, but a rise of 8.4 per cent from the same period last year. An outage at the M5000 plant in February was responsible for the slight fall in production. However, exports for the period amounted to 1,639.9 thousand tonnes. which represented an increase of 12.3 per cent from the previous quarter and 6.1 per cent from the first quarter of 2007.

#### Iron and Steel

The local iron and steel industry witnessed some level of contraction over the period as production and exports of all iron and steel products decreased when compared to the previous guarter. This was mainly on account of industrial action at the local plant in March 2008, which resulted in the temporary shutdown of the DRI plant and culminated with some workers being relieved of their duties. Since DRI is an important input into the other products manufactured at the plant, production of all other products declined as а consequence.

DRI production totalled 457.6 thousand tonnes during the period while exports amounted to 334.1 thousand tonnes. These figures indicated that production decreased by 16.6 per cent while exports fell by 6.0 per cent from the previous period. However, when compared to the same period of 2007, production and exports increased by 8.0 per cent and 14.3 per cent, respectively. Billet production over the period totalled 110.8 thousand tonnes, which was 41.6 per cent below production of the previous quarter and 29 per cent lower than that of the first quarter of 2007. Meanwhile, the sale of billets to the local market amounted to 38.5 thousand tonnes.

For the first three months of 2008, wire rod production totalled 80.7 thousand tonnes, 42.1 per cent less than production levels in the previous quarter and 25.9 per cent lower than the same period last year. Exports of wire rods amounted to 102.0 thousand tonnes, corresponding to a fall of 10.1 per cent from the last quarter and 6.8 per cent from the same period the previous year.

#### AGRICULTURE

#### Sugar

In 2007, the Sugar Manufacturing Company Limited (SMCL) bought 334,000 tonnes of cane from 3,000 farmers at \$205 per tonne and exported 25,000 tonnes of refined sugar made from locally grown cane. However, the sugar industry contracted in 2008 as the government is no longer funding the activities of the sector. As a result, SMCL no longer purchases sugar cane from farmers or produces sugar. Nevertheless, the SMCL has retained the refining aspect of its business and imports raw sugar from several Latin American and Caribbean countries, which is refined at the Ste. Madeline facility.

At present, the refinery is being targeted for an upgrade that is expected to cost approximately TT\$10 million. This upgrade will assist in expanding the refining capacity from 60,000 tonnes currently to 100,000 tonnes.

The European Union has allocated approximately  $\notin$ 41 million to assist farmers in the overall restructuring of the agriculture industry.

#### LABOUR MARKET

Employment conditions continued to reflect the buoyant level of economic activity in Trinidad and Tobago. During the first quarter of 2008, the labour force totalled 620.8 thousand persons, an increase of 5.4 thousand persons when compared to the corresponding quarter of 2007. The number of persons with jobs totalled 588.4 thousand, as an additional persons 13.3 thousand obtained employment. As a result, the rate of unemployment declined to 5.3 per cent compared with 6.5 per cent from the same quarter a year earlier.

The Services sector was the main source of employment during the quarter, as the number of persons with jobs in the sector rose by 10.9 thousand persons. The increase was attributable to higher employment in Construction (9.7)thousand persons), Community, Social and Personal Services (5.9 thousand persons), Transport, Storage and Communication sector (4.9 thousand persons), Agriculture (400 persons) and

Electricity and Water (2.3 thousand persons). However, there was a fall of 1.9 thousand persons with jobs in the Manufacturing sector, while in the Petroleum sector 3.6 thousand persons lost their jobs. In the petroleum sector, most of the reduction was concentrated in the service contractors industry, although restructuring activities at two large multinationals engaged in the upstream industry also contributed to the fall in employment. Further, the Wholesale and Retail trade sector recorded a decline in the number of persons with jobs in the amount of 4.1 thousand persons.

As the year progresses, employment levels should remain robust. However, a possible threat to the creation of new jobs is inflation. Inflation creates uncertainty, particularly in investment decisionmaking. If inflation and inflationary expectations are not contained, employment conditions may deteriorate as business costs rise.

#### PRICES

Globally, the management of inflation is proving to be a major challenge for many monetary authorities. While earlier in 2008, waning economic growth was considered the preeminent threat to the advanced economies, deep concerns about inflation have now intensified. At the domestic level, inflation management is no less of a challenge when compared to Trinidad and Tobago's more developed counterparts. As a small, open economy Trinidad and Tobago is highly susceptible to imported inflation.

In the twelve months to May 2008, headline inflation accelerated to 10.0 per cent compared with 7.9 per cent for the corresponding period of 2007. This was the first occasion since October 2006 that headline inflation rose to double-digit levels. The main contributor to the higher rate of headline inflation was the acceleration in the Food and Non-Alcoholic Beverages sub-index to 21.8 per cent compared with 17.3 per cent for the same period a year earlier. There were notable increases across nearly all categories of the food sub-index. Some of these included: Bread and Cereals (35.1 per cent); Fish (25.4 per cent); Milk, Cheese and Eggs (25.8 per cent); Oils and Fats (20.2 per cent); Fruit (33.6 per cent) and Vegetables (22.6 per cent). The larger price increases were concentrated in imported items and their derivates, for example, wheat or flour. The National Flour Mills has adjusted prices on two occasions since the start of 2008 and another rise of 29 per cent is scheduled for July 1, 2008. Nevertheless, there has been a deceleration in the price increases of vegetables when compared to a year ago due to rising supply.

On a year-on-year basis to May 2008, core inflation measured 5.2 per cent compared with 4.5 per cent for the corresponding period a year earlier.

Accelerations were observed in Education (16.4 per cent); Hotels, Cafes and Restaurants (19.2 per cent) and Alcoholic Beverages and Tobacco (13.5 per cent). The rise in the Education sub-index was on account of elevated tuition fees at some schools. Meanwhile, higher food prices and wage pressures served to augment the cost of dining out. However, there have been noticeable decelerations in Housing, Water, Electricity, Gas and Other Fuels (1.9 per cent) and Transport (2.8 per cent).

#### Wholesale prices

The changes in wholesale prices were similar to those observed at the retail level. The Index of Producers' Prices (the price which manufacturers receive for their output) rose by 9.1 per cent during the first quarter of 2008 when compared to the same quarter a year earlier. The larger price hikes were observed in the Drink and Tobacco and Food Processing industry groupings, with the former rising by 18.6 per cent and the latter, 14.2 per Within Drink and Tobacco, the cent. producers of non-alcoholic beverages experienced an increase of 29.5 per cent in the price of their output. In Food Processing, prices rose in the Flour milling and Vegetable oils and animal fats industries by 37.9 per cent and 19.1 per cent, respectively. The rise in prices in both industries was directly attributable to the acceleration in the price of wheat and oils on the international market as a consequence of intensified demand by emerging Asian economies.

In addition, the prices of Readymix concrete and Bricks, blocks and tiles escalated by 24.5 per cent and 21 per cent, respectively. This contributed significantly to an overall increase in the Chemical and Non-Metallic Products industry grouping of 9.0 per cent. There were smaller increases in the Wood Products (5.2 per cent) and Assembly-Type and Related Industries (1.6 per cent) groupings. Furthermore, negligible price changes were observed in the Textiles and Garments and Printing, Publishing and Paper Converter industries.

#### **CENTRAL GOVERNMENT FISCAL OPERATIONS**

During the first half of the current fiscal year (October 2007-March 2008), the central government's fiscal operations resulted in an overall surplus of \$2,022.9 million. This was higher than the surplus realized (\$715 million) in the corresponding six-month period of fiscal 2007. The larger surplus can be attributed to a faster rate of growth in revenue as compared with expenditure.

Total revenue grew by 36.1 per cent to \$21,854.3 million in the first six months of fiscal year 2007/2008. This was due to increased oil receipts, which amounted to \$11,446.4 million compared with \$7,694.7 million recorded in the period October 2006 to March 2007. Oil prices averaged US\$94.31 per barrel (WTI) during the period under review, an increase of US\$35.32 per barrel (WTI) when compared to the same period in fiscal year 2006/2007. The rise in petroleum prices more than offset declining production levels, which fell by 7.6 per cent to 116.5 thousand (b/d).

At the end of the first half of the current fiscal year, non-oil revenue stood at \$10,407.9 million, an increase of 24.4 per cent. Higher receipts from taxes on income and profits and goods and services would have contributed to this. Taxes on income and profits totalled \$5,008.5 million for the six-month period to March 2008, compared with \$3,786.9 million for the same period one year earlier. Increased receipts from companies and personal income taxes were the main contributors to the rise in collections from taxes on income and Taxes on goods and services profits. (\$3,861.3 million) continued to trend upwards due to rising collections from the Value Added Tax. Large unspent balances from statutory boards and similar bodies resulted in capital revenue increasing sharply to \$17.1 million for the six month period in fiscal year 2007/2008 from \$3.2 million in the corresponding period one year earlier.

Central government expenditure maintained its upward trajectory during the review period reaching \$19,831.4 million. This figure exceeded expenditure in the corresponding period of the previous fiscal year by \$4,483 million.

All of the major categories of expenditure grew, but increased were especially large for transfers and subsidies, wages and salaries and capital expenditure. Transfers and subsidies rose by \$2,060.1 million to \$9,741.4 million due to greater allocations to state enterprises and Higher salaries, statutory boards. gratuities and pension payments also exerted upward pressure on wages and salaries which grew by 28.3 per cent to \$3,518.1 million.

Expenditure on capital projects and programmes expanded to \$3,318.8 million for the period October 2007 to March 2008 from \$2,210.3 million one year earlier. On the domestic financing side, repayments were \$459.1 million for the six month period to March 2008 and did not vary significantly from \$489.7 million in the corresponding period in fiscal year 2006/2007.

External disbursements, however, were significantly reduced to \$145.9 million as at March 2008 compared with \$1,030.7 million for the six month period in fiscal year 2006/2007 when disbursements included a US\$150 million Eurobond. At the end of March 2008, the central government amassed deposits of million \$15,001.1 compared with \$20,640.6 million at the end of March 2007. Meanwhile, the balance in the Heritage and Stabilization Fund stood at \$12,475.9 million by the end of May 2008.

#### Box 2 The Petroleum Products Subsidy in Trinidad and Tobago

#### The Petroleum Production Levy and Subsidy Act

The retail price of gasoline and other petroleum products in Trinidad and Tobago is subsidized through the Petroleum Production Levy and Subsidy Act (1974). The levy and subsidy was first introduced to insulate residents from the sharp increase in petroleum prices and to ensure that they directly benefitted (through low and stable prices) from the oil windfall. The entire cost of the subsidy was initially borne by oil-producing companies. However, in 1992 the Petroleum Production Levy and Subsidy Act was amended to restrict the amount of levy to be paid by any producing company to not more than 3 per cent of the company's gross income. The Act was further amended in 2003 by increasing the company's limit to 4 per cent of its gross income and exempting from the levy altogether, companies which produced less than 3,500 barrels of crude per day. Any share of the subsidy in excess of the 4 per cent cap is currently borne by the government. This has implications for the size of the government's contribution to the overall subsidy, especially in times of rising petroleum prices.

#### The Petroleum Subsidy Mechanism

The subsidy mechanism involves the reimbursement of the wholesale companies for the difference between the international market price and the controlled consumer price of petroleum fuels. Wholesalers, the National Petroleum Marketing Company Limited (NP) and United Independent Petroleum Marketing Company Limited (UNIPET) acquire petroleum products from Petrotrin at international prices. Retailers sell to consumers at fixed government-controlled retail prices. Government then refunds the wholesalers for the difference in the fuel costs. Part of the subsidy is recovered by government through the Petroleum Levy.

#### Trends in the Petroleum Subsidy

The Petroleum Subsidy grew from \$449.4 million in 2000 to \$2,207.7 million in 2007. This was directly related to changes in crude oil prices which increased from US\$30.29 per barrel (WTI) to US\$72.20 per barrel (WTI). The central government's contribution to the subsidy increased from 3.2 per cent (TT\$2.96 million) of the total cost of the subsidy in 1992 to 75.9 per cent (\$1,675.9 million) in 2007. This trend is expected to continue this year since crude oil prices are expected to remain above US\$100 per barrel (WTI). These developments, coupled with the growth in the non-oil fiscal deficit have prompted discussions surrounding either the reform or removal of the subsidy.

#### PUBLIC SECTOR EXTERNAL DEBT

(Data in this section are in US dollars)

At the end of May, external debt outstanding stood at \$1,410.6 million, an increase of \$9.3 million from December 2007 as disbursements over the period exceeded repayments.

Disbursements to the public sector amounted to \$36.9 million, of which \$11.5 million originated with the Inter American Development Bank (IDB) for the continuation of projects in education, highway construction and national settlements. The balance (\$25.3 million) was in respect of a commercial loan contracted with Lloyd's Offshore TSB of London for the design and supply of offshore patrol vessels.

Public sector debt service increased by \$5.9 million to reach \$61.7 million by the end of May 2008. Principal repayments valued at \$28.1 million pertained in the main to multilateral debt obligations. The Inter American Development Bank (IDB), the World Bank (IBRD) and the Caribbean Development Bank (CDB), received \$20.4 million, \$5.6 million and \$1.6 million, respectively in debt service payments. In addition, obligations to the European Investment Bank (EIB) and the EEC amounted to \$0.3 million. Interest payments of \$33.6 million comprised payments bond (\$19.5 million). multilateral payments (\$9.2 million) and interest on commercial loans (\$4.8 million).

#### DOMESTIC DEBT

Central government domestic debt outstanding was recorded at \$12,349.7 million at the end of May 2008, a decrease of \$58.9 million from the end of the first quarter of the year.

The central government was not involved in any capital market activity during this period, in keeping with the trend that has existed since June 2007. Debt service payments to domestic creditors were considerably higher (\$137.9 million) than the last reporting period in 2007. Repayments which encompass GOTT bonds and public sector emolument bonds amounted to \$99.5 million while interest payments were \$413.3 million.

Total contingent liabilities to the central government amounted to \$462.8 million and displayed a marked increase of \$91 million from the last quarter of 2007. The Public Transport Service Corporation (PTSC) and the Trinidad and Tobago Electricity Commission (T&TEC) contracted \$14 million and \$448.8 million, respectively to purchase buses and to supply a generating plant for the Cove Industrial Estate in Tobago.

#### MONEY, CREDIT AND INTEREST RATES

During the first five months of 2008, the Central Bank maintained its tight monetary policy stance, as inflationary pressures continued to mount. After falling from 9.1 per cent in the twelve months to December 2006 to 7.6 per cent in December 2007, inflation once again gained momentum in the first five months of 2008. Inflation accelerated on a yearon-year basis to 10 per cent in May 2008, reflecting sharp increases in food prices.

In light of strong inflationary pressures, the Central Bank took further actions to tighten monetary policy during the review period. In February 2008, the Bank raised the repo-rate by 25 basis points to 8.25 per cent, the first increase since September 2006. The reserve requirement ratio for commercial banks was increased simultaneously to 13 per cent from 11 per cent after remaining unchanged for nearly four years.

addition, through open market In operations, the Bank issued net treasury bills and notes amounting to \$2,769.5 million during the five-month period January to May 2008. The Bank, also indirectly, through the sale of foreign exchange to the financial system, withdrew TT\$2,465.6 million. As a result of these actions, liquidity measured by commercial banks' excess reserves, was relatively contained. In the five months to May 2008, banks' excess reserves averaged \$258 million, compared with \$305.7 million in the previous five month \$202 million period and in the corresponding period one year ago. With liquidity conditions tightening, there was an increase in commercial banks' repo In the review period, 'repo' activity. \$164.7 activity averaged million, compared with \$65.7 million in the fivemonth period August to December 2007 and \$57.2 million when compared to the period Januarv to Mav 2007. Nevertheless, the Bank continued to be challenged by large fiscal injections, one of the major sources of liquidity. Net fiscal injections amounted to \$4,475.4 million in the five months to May 2008 compared with \$3,434.1 million in the corresponding period one year ago.

The relatively tight liquidity conditions and the increase in the repo rate in February 2008 led to a general increase in short-term money market rates. The inter-bank rate increased to an average of 7.39 per cent in May 2008 from 7.24 per cent in December 2007, peaking at 7.46 per cent in March 2008. Treasury bill rates also trended upwards during the review period. The three-month treasury bill rate rose to 7.04 per cent in May 2008 from 7 per cent in December 2007, while the six-month rate moved to 7.17 per cent in May 2008 from 7.11 per cent in December 2007. The stability in the TT three-month treasury bill rate and falling US interest rates in the five months to May resulted in a widening of the spread between the TT and US three-month treasury bill rates. The differential between the two rates widened to 518 basis points in May 2008 from 369 basis points in December 2007.

Longer-term interest rates also trended upwards during the period, as the commercial banks' prime lending rate increased to 12.25 per cent in March 2008 from 11.75 per cent in February and has remained at this level as at May 2008. Banks' weighted average lending and deposit rates also climbed, with lending rates moving to 10.96 per cent in March 2008 from 10.68 per cent in December. The weighted average deposit rate has increased at a much slower rate, moving to 2.96 per cent in March 2008 from 2.76 per cent in December 2007. As a result, the spread between the weighted average lending rate and deposit rates widened to 8.2 per cent in March 2008 from 7.92 per cent at the end of 2007. Furthermore, commercial banks' residential mortgage rates increased by 50 basis points to 9.25 per cent in March 2008.

Private sector credit extended by the consolidated financial sector continued to exhibit robust growth, despite higher interest rates. On a year-on-year basis to May 2008, credit granted by the consolidated financial system grew by 18.8 per cent compared with 16.7 per cent one year ago.

Once again, commercial banks were largely responsible for the growth in credit. Growth in credit to the private sector by commercial banks accelerated to 24.6 per cent on a year-on-year basis to May 2008 compared with 20.9 per cent in May 2007. There were strong increases in all the major components of credit, consumer, real estate and business. Consumer credit and real estate mortgage loans expanded by 19.4 per cent and 28.8 per cent, respectively in May 2008, compared with 17.9 per cent and 19.1 per cent. respectively one vear ago. Meanwhile, growth in business lending accelerated to 23.1 per cent in May 2008 from 22.0 per cent in the corresponding period one year ago. In contrast to the robust growth in commercial bank lending, credit granted by non-bank financial institutions continued to decline, falling by 16.6 per cent in May 2008 compared with 3.7 per cent one year ago.

Given the buoyant economic conditions and the growing employment levels, the monetary aggregates continued to exhibit robust growth. Narrow money (M-1A), grew by 21.1 per cent in the twelve months to May 2008 from 7.5 per cent in the corresponding period a year earlier. Of the components of M-1A, demand deposits accounted for the majority of the change, increasing by 21.3 per cent compared with 5.3 per cent a year ago. The broad money supply, M-2, which consists of M-1A plus savings and time deposits also accelerated in the twelve period ending Mav month 2008. increasing by 21.4 per cent compared with 12.0 per cent in the corresponding period one year earlier. Savings and time deposits advanced by 16.0 per cent and 29.8 per cent, respectively. Quasi money, which is the sum of savings and time deposits, grew on a year-on-year basis by 24.6 per cent compared with 11.9 per Conversely, foreign currency cent. deposits held at commercial banks grew at a slower rate of 12.4 per cent compared with 23.9 per cent in May 2007.

|-------------------------------|--|--|--|--|--|
| THE RBTT and RBC Amalgamation |  |  |  |  |  |

On October 1 2007, RBTT Financial Group (RBTT) entered into an agreement with Royal Bank of Canada (RBC) to combine RBC's Caribbean retail banking operations with RBTT. This would entail the acquisition of RBTT by RBC Holding (Trinidad and Tobago), an indirectly wholly owned subsidiary of RBC for a total purchase consideration of TT\$13.8 billion (approximately US\$2.2 billion at an exchange rate as of September 28 2007).

At a special meeting held on March 26 2008, 98.2 per cent of RBTT shareholders voted for the amalgamation of the two companies. Upon completion of the transaction which was scheduled for May 19 2008, RBTT shareholders would receive for each RBTT share TT\$40.00 comprising TT\$24.00 in cash (60 per cent) and approximately TT\$16.00 (40 per cent) worth of a RBC common share based on a closing average RBC share price of US\$54.42. However, the share price could vary between TT\$38.22 - TT\$41.45 per share since the transaction included a collar mechanism of 10 per cent above or below US\$54.42.

Collectively, RBTT shareholders would receive TT\$8.3 billion (60 per cent) in cash and the remaining 40 per cent in RBC common shares equivalent to TT\$5.5 billion. Of the cash consideration, RBTT shareholders elected to receive 56.9 per cent in TT dollars (TT\$4.7 billion) and the remaining 43.1 per cent in US dollars (US\$563.6 million). The amalgamation of RBC and RBTT was completed on June 16, 2008.

 TABLE 1

 Distribution of the Cash Component of the Consideration

#### CAPITAL MARKETS

#### Bond Market

During the first five months of 2008, primary bond market activity increased as twelve (12) new bonds were issued compared with nine (9) for the same period one year earlier. However, the aggregate face value of these twelve placements amounted to TT\$2.7 billion, a little lower than the TT\$3.3 billion for the nine issues in the corresponding period of 2007. While local companies were the dominant borrowers on this market, regional sovereigns (St. Kitts and Nevis and St. Vincent and the Grenadines) also raised an amount equivalent to TT\$552.6 million by offering three bonds between January and May 2008. Two were placed in US dollars and the other in Eastern Caribbean (EC) dollars.

All the offerings during this period were through private placements. Among the local firms, one company issued a US dollar bond (US\$25.5 million) with a 3year tenor and a coupon rate of 11 per cent. Over the five-month period, the term to maturity on the bonds issued by domestic companies ranged from two years to ten years while the per annum interest rates ranged from 6.75 per cent on the Home Mortgage Bank bond to 11 per cent on the bond placed by Angostura Limited. On average, these rates were slightly higher than those offered over the same period a year ago.

#### Equity Market

Following a period of relatively low trading in the first two months of 2008, activity in the stock market picked up markedly from around mid-March. This bullish performance can be attributed to increased business confidence and strong optimism following the release of encouraging financial statements bv several listed companies. The amendment to the pension plan legislation which was assented to in September 2007 mav have also market contributed to increased participation by qualified pension funds. As such, movements in stock market indices spanning mid-March 2008 to May 2008 exhibited sharp upward trends, with the Composite Price Index (CPI 1983=100) surpassing 1000 points for the first time since February 2006, while the All Tobago Index Trinidad and (ATI 1990=100) increased by almost 20 per cent. At the end of May 2008, the CPI was 1141.1 points and the ATI was 1472.6 compared with 992.9 and 1256.6 points, respectively at the end of March 2008.

In the first five months of 2008, the volume of shares traded amounted to sixty-three million. This represented an increase of 40 per cent over the forty-six million shares that were traded during the same period in 2007. This heightened market activity led to a rise in stock market capitalisation which grew to \$115.2 billion at the end of May 2008 from \$98.5 billion at the end of 2007, an increase of 17 per cent. On a year-on-year basis, stock market capitalisation rose by 27 per cent. At a sectoral level, the Manufacturing II index recorded the largest growth, climbing to 999.8 points

at the end of May 2008 from 689 points at the end of 2007. This sector includes Readymix (West Indies) Trinidad Limited and Trinidad Cement Limited, both of which were among the top three performers on the first tier market over five-month period. The other the performing sectors included Non-Banking Finance, Conglomerates and Property which expanded by 38.2 per cent, 21.8 per cent and 18.3 per cent (YTD), respectively.

#### **Mutual Funds**

The upswing in stock market activity led to an improvement in the performance of the mutual funds industry. At the end of 2008, total funds under March management by major institutions in the economy stood at \$34.9 billion. This represented an increase of 1.1 per cent over the previous quarter and 8.6 per cent when compared to the same quarter one year ago. These growth rates mirrored those of the money market segment which grew to \$29.1 billion at the end of the first quarter of 2008 from \$28.8 billion in the previous quarter.

TT-dollar denominated money market funds have marginally outperformed their US-dollar counterparts. Returns on the TT dollar denominated funds averaged 6.4 per cent in the first quarter of 2008 compared with 5.4 per cent for US denominated funds. Average returns on the TT dollar income and growth funds are likely to emerge from the negative territory in 2008 because of the current advancements and projections for buoyant stock market activity going forward.

#### Box 4 Significant Capital Market Developments

- 1. January 2008 A platform for Secondary Trading of Government Securities was launched.
- 2. February 2008 Neal and Massy Holding Limited successfully took over Barbados Shipping and Trading Company Limited.
- 3. March 2008 RBTT shareholders voted in favour of the sale of RBTT to the Royal Bank of Canada. This deal is expected to be completed in June 2008.
- 4. March 2008 The Securities and Exchange Commission of Trinidad and Tobago granted approval for a five-day trading week which took effect from April 01, 2008.
- April 2008 The Trinidad and Tobago Securities and Exchange Commission recommended to the Minister of Finance under 131 (1) of the Securities Industry Act, the Securities Industry (Depositary Receipts) By Laws, 2008. These proposed By Laws would facilitate the issue of and trading of depositary receipts in Trinidad and Tobago.

#### INTERNATIONAL TRADE AND PAYMENTS

(Data in this section are in US\$ unless otherwise stated)

#### Balance of Payments

Preliminary data suggest that during the first quarter of 2008, the balance of payments recorded a surplus of \$663.1 million mainly on account of the continued solid performance of the merchandise trade account. The value of exports and imports in this period amounted to \$2,708.3 million and \$2,069.9 million, respectively. By the end of May 2008, gross official reserves stood at \$7,407.5 million or 9.6 months of prospective imports of goods and nonfactor services. The outturn in the first quarter of 2008 followed on the strong performance in the fourth quarter of 2007, when the BOP registered an overall surplus of \$298.6 million, bringing the annual surplus to \$1,541.1 million or 7.3 per cent of GDP.

Favourable prices for Trinidad and export commodities Tobago's main assisted in strengthening the current account of the balance of payments. In the fourth quarter of 2007, however, the full effect of these price increases was not realized because of a fall in export volumes of some key commodities. The trade surplus amounted to \$2,333.6 million bringing the cumulative balance on the current account for the year 2007 to \$5.4 billion or 25.8 per cent of GDP. Merchandise exports increased by 38.3 per cent in the fourth quarter, mirroring significant increases in chemicals and mineral fuel and lubricants by \$827.8 million and \$414.9 million, respectively. Similarly, the value of imports increased by \$167.9 million relative to the third quarter, due to higher imports of machinery and transport equipment as well as manufactured goods of \$121.3 million and \$7.6 million, respectively.

In contrast to the positive outcome observed on the current account, the capital account recorded a deficit of just under \$2 billion. Net foreign direct investment amounted to \$195 million while the net outflows of regional bonds amounted to \$135 million. Disbursements on central government borrowings from multilateral sources amounted to \$57.9 million, while principal repayments on existing external debt fell from \$25.3 million in the previous quarter to \$6.7 million in the reporting quarter. The debt service ratio for the quarter ending December 2007 was estimated at 1.3 per cent. After falling by \$59.2 million in the third quarter, commercial banks' net foreign position fell by \$61.6 million in the fourth quarter.

At the end of March 2008, Trinidad and Tobago's net foreign reserves stood at \$8,459.9 million, \$316.9 million more than at the end of 2007. This change reflected an increase in the assets of the Central Bank of \$385.8 million and a decrease in the assets of commercial banks of \$68.9 million. Gross foreign assets reached \$9,415.4 million. During this period, Gross official reserves net of the Heritage and Stabilization Fund amounted to \$7,336.6 million at the end of March 2008, equivalent to 9.5 months of prospective imports of goods and nonfactor services.

#### Effective Exchange Rates

On a year-on-year basis, the tradeweighted real effective exchange rate (TWREER) index increased by an average of 0.4 per cent for the first five months of 2008 compared with a decline of 0.3 per cent in the previous five months. This increase suggests that locally produced goods experienced minimal loss of international price competitiveness relative to foreign goods. To a large extent, the widening of the inflation differential resulted in the directional change of the TWREER index.

Against the background of high and rising global food prices, domestic inflation as measured by the Retail Prices Index (RPI) climbed to double-digits in January 2008. In the subsequent three months, the inflation rate remained just below the ten per cent milestone before climbing back to ten per cent in May 2008. As such, yearon-year domestic inflation averaged 9.7 per cent for the first five months of 2008 compared with a 6 per cent weighted average inflation rate for the country's major trading partners. Consequently, the inflation differential widened by 3.7 per cent compared with 2.9 per cent in the previous five months.

The trade weighted nominal effective exchange rate (TWNEER) index which shows the effect of exchange rates on the TWREER, continued its downward trend for the first five months of 2008. The TWNEER index declined at an average rate of 3.2 per cent between January and May 2008 compared with 3.1 per cent in the previous five months. Most of the gains occurred in the first four months when the US dollar depreciated sharply against the currencies of major trading partners while it remained relatively against unchanged the Trinidad and Tobago (TT) dollar. During March and April, respectively, the Japanese yen traded below ¥100 per US\$1 for the first time since October 1995 and the US dollar traded at its lowest values against the Euro since its launch in 1999. Meanwhile, the TT dollar appreciated against the US dollar as a consequence of the RBTT and RBC amalgamation. The culmination of these movements led to a slowdown in the pace at which the TWNEER index declined during April and May 2008. Overall, the favourable exchange rate movements between January and May 2008 were outweighed by the strong and negative inflation effect.

# TABLE 1 TRINIDAD AND TOBAGO EFFECTIVE EXCHANGE RATES

#### **REGIONAL ECONOMIC DEVELOPMENTS**

#### LATIN AMERICA AND THE CARIBBEAN

Economic activity in Latin America and the Caribbean (LAC) grew by a robust 5.6 per cent in 2007, its fourth consecutive year of strong expansion. This growth performance was driven primarily by domestic demand with sharp increases in private consumption and gross capital formation. Current account surpluses declined have and inflation has accelerated to 6 per cent (the highest level since 2002), compared with 5 per cent a year earlier. Higher inflation was largely as a result of strong domestic demand along with rising global food and energy Capital inflows have been prices. maintained leading to an generally appreciation in exchange rates and contributing to a continued build up in international reserves. In the Caribbean region, growth averaged 4.8 per cent in 2006-2007, the fastest pace in more than two decades, underpinned by a favourable environment. external private construction, preparations for the Cricket World Cup, and energy exports (in Trinidad and Tobago).

With the recent turbulence in financial markets and weakened global growth prospects, economic activity in the LAC region is projected to moderate to 4.4 per cent in 2008. Current account positions are expected to weaken further, and private capital inflows are also likely to moderate from the very high rates observed in 2007. Inflation will continue to pose a challenge for the region as strong demand coupled with exogenous external shocks, especially to food and fuel prices, put upward pressure on prices.

#### Barbados

During the first three months of 2008, the Barbados economy grew by 2.4 per cent, compared with 2.6 per cent in the corresponding quarter of 2007. A robust rebound in tourism activity coupled with a moderate expansion in manufacturing output provided the main impetus for economic growth. Preliminary data indicate that tourism value-added rose by 9.7 per cent during the quarter. Manufacturing output is estimated to have increased by 1.5 per cent, compared to the decrease of 1.5 per cent recorded in the first quarter of 2007. This outturn was reflected in higher output from food processing which offset lower production of chemicals and beverages. Growth in construction activity, increased by 2.7 per cent compared with 1.7 per cent in the similar period last year.

At the end of April 2008, the twelve month moving average rate of inflation fell to 7.5 per cent compared with 6.2 per cent for the corresponding period a year earlier.

Despite a sizeable rebound in government revenue (due to increased collections of VAT as well as a higher take from import duties and excise taxes), the fiscal deficit at the end of the first quarter stood at Bds\$128.9 million, almost four times the deficit recorded а year earlier. Government expenditure grew by over 20 per cent largely on account of transfers and subsidies which rose by an estimated 30 per cent (Bds\$86.8 million). These included increased payments to the University of the West Indies, the Barbados Agricultural Development and Management Corporation as well as the Transport Board. In addition, the goods and services category showed an increase of approximately 47.3 per cent (Bds\$40.5 million) as some items of capital expenditure were reclassified and shifted to this category. Capital expenditure is also estimated to have risen significantly.

The external current account deficit improved over the review period decreasing from Bds\$37 million in the fourth quarter of 2007 to Bds\$7.5 million in the reporting quarter. The double-digit surge in retained imports was mainly attributable to strong growth in the imports of intermediate goods, which in turn were influenced by high fuel prices. Domestic exports, however strengthened moderately, owing mainly to increased exports of electronic components and food and beverages. Relative to surpluses of Bds\$140.4 million and Bds\$214.1 million in the first quarters of 2006 and 2007

respectively, the capital and financial account surplus narrowed to an estimated Bds\$102.4 million in the first quarter. This was largely as a result of significant private outflows related to the repayment of tourism-related loans.

#### Jamaica

The economy of Jamaica is estimated to have grown within the range of 1.0 - 1.5per cent for the first three months of 2008, with growth in the tradable sector recovering somewhat while there was continued expansion in the non-tradable sector. The main sectors contributing to the positive outturn were Construction and Installation, Transport, Storage and Communication, Distributive Trade. Financing and Insurance and Miscellaneous Services which includes Tourism. Agriculture. Forestrv and Fishing, Electricity and Water and Mining and Quarrying were all estimated to have declined during the reporting quarter.

Headline inflation accelerated to 22.5 per cent on a year-on-year basis to May 2008, compared with 7.8 per cent in the corresponding period one year ago. Rising prices of domestic agricultural commodities and international grain prices coupled with the pass-through effects of increases in energy costs, all contributed to higher inflation. As a result of high energy cost, government introduced subsidies during the quarter to cushion the effects of the increase in of some the prices international commodities. Against this backdrop, the Bank of Jamaica is forecasting inflation to escalate to 11.5 per cent to 14.5 per cent over the fiscal year 2008/2009 (April-March) with the sharpest increase being reflected in the first half of the year.

During the quarter, a softening in external interest rates together with increased uncertainties regarding conditions in the international financial market encouraged investments in domestic instruments. Conditions in the market were also buoyed by inflows related to the sale of a Jamaican rum manufacturing company (Lascelles de Mercado) to a Trinidadian company (Angostura). In light of the global economic slowdown and high commodity prices, Jamaica's economy faces the risks of slowing growth, rising inflation and a widening current account deficit. Going forward, the main challenge for the Central Bank will be to temper the rate of price increases and moderate inflationary expectations. In this regard, the Bank is expected to maintain a tight monetary policy stance.

#### Guyana

Preliminary estimates indicate that Guyana grew modestly during the first quarter of 2008. This was largely on account of continued growth in the mining and quarrying sector as well as in manufacturing. Bauxite output increased by 44.6 per cent as a result of continued investments in equipment and workers, while gold output grew by 9.5 per cent on account of increases in international gold prices. However, diamond output declined by 53.3 per cent on account of relatively low prices. Despite sharp increases in fuel prices, the manufacturing sector registered growth in production. To the contrary, the agricultural sector, facing inclement weather in early 2008, saw a decline in the production of sugar and rice by 11.5 per cent and 40 per cent, respectively. While output in the livestock and forestry sectors also contracted.

With continued increases in global fuel and commodity prices, preliminary estimates showed that inflation reached 11.6 per cent year-on-year to March 2008 compared with 8.2 per cent in March 2007.

Guyana recorded a balance of payments surplus of US\$28.7 million during the first quarter of 2008 compared with \$3.6 million for the corresponding period of 2007. The current account deficit widened as a result of higher fuel payments, consumer goods and machinery imports linked to agricultural and infrastructural investments across the economy. This more than offset the 21 per cent increase export earnings resulting from in favorable prices for gold and greater volumes of bauxite sales. Workers'

remittances also rose marginally compared to the previous year, with inward bank receipts showing significant growth in the first quarter. The capital account, however, registered a huge surplus of US\$72.5 million compared with US\$37 million during the first quarter. This improvement resulted from an increase in disbursements and stronger FDI inflows, coupled with a reversal in foreign assets accumulated by commercial banks.

Central government's first quarter results showed marked improvement over the corresponding period last year due to increased collections from both the Revenue Department Internal and Customs and Trade Administration. Higher receipts derived from excise tax and VAT, elevated transfers from corporations as well as revenues in the form of grants. Overall expenditure was in line with first quarter targets. However, current expenditure was larger due to increases in employment cost and other charges, while capital expenditure was lower during the first quarter. In this context, the primary impetus to spending during this period emanated from the rehabilitation to the water supply system as well as programs in respect of social services and public safety under the Public Sector Investment Program.

#### Mexico

The Mexican economy expanded by 3.3 per cent in 2007, compared with 4.8 per cent a year earlier. This was largely as a result of buoyant services which offset any weaknesses in industrial output. Growth in Real GDP is expected to moderate to 2.8 per cent in 2008 largely due to the expectation that the US economy will in fact be in recession.

Preliminary data suggest that the country's current account deficit widened during the first quarter due to vulnerabilities in the oil sector. particularly the lack of refining capacity. The trade deficit for the first two months of 2008 has more than doubled compared to the same period in 2007, and is expected to expand considerably to \$19.8 billion for 2008. Export growth declined marginally to \$22.8 billion in February despite the growth in manufacturing exports of 13.6 per cent year-on-year to \$18.1 billion. The diversification of export markets helped cushion falling demand in the US. Non-oil exports to the US also grew by 7.9 per cent year-on-year, while those of the rest of the world increased by 32.2 per cent annually. Import growth accelerated to \$24.8 billion in February as consumer goods imports increased by 34.3 per cent. Given the government's ambitious infrastructural development plan, capital goods imports also increased by 48.6 per cent. In addition, imports of intermediate goods have also seen continued growth acceleration to \$17.5 billion in February.

With respect to inflation, Mexico's annual inflation rate rose to 4.95 per cent yearon-year in May, close to the upper range of the central bank's revised forecast range of 4.5 to 5 per cent. This figure was largely driven by higher food, housing and transportation prices. As a result, the Bank raised its benchmark policy rate to 7.75 per cent in June. Also, in a bid to inflationary pressures, cap the government of Mexico announced on June 18 that there will be a price freeze of 150 staple foods until the end of 2008. The government is also issuing food stamps worth M\$120 (US\$11.30) per month to poor citizens. Other initiatives by the Mexican government to ease food price inflation include the establishment of a strategic reserve of 500 thousand tones of maize and a waiver of import duties on various grains.

### Venezuela

On account of the robust performance of the non-oil sector, economic activity in Venezuela expanded by 8.4 per cent in 2007, its fifth consecutive year of sustained growth. The non-oil sector expanded by 9.7 per cent while growth in the energy sector declined by 5.3 per cent. Among the activities contributing to nonoil sector growth were communications; financial institutions and insurance companies; commerce and repair services; transportation and warehousing; community, social and personal services; and construction. Within the non-oil sector, the growth rate of the nontradable activities (12.2 per cent) exceeded the tradable ones (5.8 per cent)

with the manufacturing sector recording a growth of 7.5 per cent.

Despite the government's efforts to curb inflation through tax cuts and price controls, inflation reached 18.7 per cent in 2007 (the highest in Latin America) compared with 13.6 per cent in the previous year. This was largely on account of increases in public spending. State spending increased by 8 per cent in the first ten months of 2007 to \$45.5 billion, whereas tax revenue increased by 10 per cent to \$44.1 billion over the same period.

The external accounts recorded a current account surplus of \$21.8 million (10.5 per cent of GDP) for 2007. Given some sizeable financial transactions of the Venezuelan economy throughout the world, the balances of the capital and financial account fell to \$24.9 million, due to the holding of foreign assets in the state sector and changes in the private sector portfolio. Exports totalled \$69.5 million sustained by the persistence of world economic growth while imports were estimated at \$44.5 million given increases in domestic economic activity. With oil prices expected to remain high and the economy showing signs of resilience, real GDP is expected to expand to 5.8 per cent in 2008.

Venezuelan consumer price inflation (CPI) rose to 31.4 per cent year-on-year in May, its highest rate in five years. This rise in prices occurred despite Venezuela's efforts to curb liquidity by raising interest rates, slowing government spending and increasing bond sales to local investors. Non-regulated items (those which are not subject to price controls) rose by 39.4 per cent year-on-year, whereas those items subject to price controls increased by 22.3 per cent. Similarly, core inflation, which excludes energy-related costs, grew by a significant 35.8 per cent year-on-year. Banco Central de Venezuela The recently revised its year end inflation target upwards from 11 per cent to 19.5 per cent with the driving forces behind inflation being attributable to booming consumer demand in a context of laxed fiscal policy and negative real interest rates. This is compounded by a chronic lack of investment by the private sector, constraining output capacity.

For the first time since the oil industry crisis in 2002, Venezuela posted an overall balance of payments deficit in 2007 as the narrowing current account surplus was unable to offset the increasing capital and financial account This outlook is expected to deficit. continue in 2008 as the current account surplus weakens further and macroeconomic mismanagement continues to put pressure on the financial and capital account. Given that 90 per cent of Venezuela's export earnings come from the oil sector, the country's heavy reliance on oil revenues could pose a major threat to the long term health of the economy, and a fall in the price of oil remains one of the downside risks to the country's balance of payments.

#### **INTERNATIONAL COMMODITIES**

(Data in this section are in US dollars unless otherwise indicated)

#### Petroleum

After reaching US\$100 per barrel (bbl) towards the end of 2007, WTI crude oil prices breached the triple-digit psychological barrier on January 2, 2008. Prices retreated from this threshold in the wake of weaker economic fundamentals in the world's largest oil consumer - the United States (US). However, crude oil prices seemed unresponsive to further anaemic economic reports as prices settled above US\$100/bbl on February 19, 2008. During the first quarter of 2008, crude oil prices averaged an estimated US\$97.91/bbl which was an increase of 7.9 per cent from the previous quarter and 68.6 per cent from the corresponding quarter of 2007. On April 22, 2008, WTI crude oil prices actually hit a record high of US\$119.90/bbl.

An examination of market fundamentals failed to provide a clearer picture of what were the underlying causes of such robust crude oil prices. Although reports of declining oil production in Russia and Mexico and technical problems in Libya and the UK did provide some support to the market, there was already a general consensus that the demand-supply balance would be somewhat looser in 2008 than in the previous year due to the threat of an economic recession in the US. This was validated by the subsequent downward revisions of oil demand growth forecasts by the main energy market monitoring agencies. Initial forecasts of world oil demand growth were around 2.0 million barrels per day (b/d). However, recent projections suggest that growth would be within the range of 600,000-1.3 million b/d. This is in spite of an increase of an 8.8 per cent in Chinese oil demand during the first quarter of 2008.

Some of the factors which contributed to the uptick in prices were: -

- (i) speculation by non-commercial traders;
- (ii) a weaker US dollar;
- (iii) declining crude oil inventories;
- (iv) refinery outages and;
- (v) increased geopolitical tensions.

There was an observable increase in the interconnection between the crude oil and financial markets. A depreciating US dollar to historic lows, high inflation and ensuing monetary easing by the Federal Reserve enticed a huge inflow of funds from institutional investors (mostly hedge funds) into oil futures. A declining dollar encourages the purchase of commodities such as oil as a hedge against inflation. In fact, hedge funds were no longer randomly investing in commodities but began setting strategic allocation targets these funds. Commodity-linked for investments totalled US\$135-140 billion in 2007, an increase of over 20 per cent from the previous year. Some estimates indicated that non-commercials added a premium of 25-40 per cent to oil prices. Support for such an assertion was observed in late March when some speculators, in response to liquidity concerns sparked by the Bear Stearns meltdown, liquidated their positions causing a daily decline of almost US\$5/bbl in the price of oil on the futures market.

In January, US commercial crude stocks reached their lowest level in 4 years (282.8 million barrels) because of a decline in imports and higher refinery throughput. Inclement weather forced a temporary halt to crude imports from Mexico and there was a reduction of imports from Saudi Arabia - the second largest supplier of crude to the US. While higher refinery utilization rates inventories contributed to gasoline reaching a 14-year high on February 21, crude stocks continued to decline at Cushing, Oklahoma - the main delivery and pricing point for WTI. Inventories increased to an estimated 311.8 million barrels by the end of the first quarter, but persistent weather-related delays continued to stymie further stock-builds. As high oil prices persisted, some refiners in the US and Europe chose to undergo maintenance earlier than usual because declining margins. This was a of significant development because it occurred at a juncture when refiners

would normally build inventories and this inadvertently supported higher crude oil prices as distillate supplies tightened. However, in April a spate of refinery outages caused refinery utilization rates to fall and inventories of products such as gasoline to decline despite slowing demand growth and higher crude imports.

A two-day labour strike in April at the 200,000 b/d Grangemouth refinery in Scotland caused BP to shutdown the 620,000 b/d Forties Pipeline System, which is dependent on the refinery for power. The unrest in Nigeria escalated with pronouncements by a separatists group of an intention to disrupt 100 per cent of crude exports from the Niger Delta. An attack on a major pipeline and a strike-induced force majeure of 770,000 of crude output in April provided support for prices in the vicinity of US\$120/bbl. However, Latin America proved to be the new hotbed during the first quarter of 2008. Venezuelan President Hugo Chavez threatened to halt exports to the US if a court order to freeze more than US\$12 billion in assets of the state oil company Petroleos de Venezuela (PDVSA) was not A motion was filed by rescinded. ExxonMobil with regard to the expropriation of the company's Cerro Negro assets in Venezuela in 2007. Exxon Mobil has since refused to receive Venezuelan crude for refining in the US, forcing cargoes to be diverted to China. OPEC voiced their support for Venezuela by issuing a public statement on the matter. There was also a diplomatic fallout between Ecuador (OPEC's newest Venezuela and Colombia member). following a border incursion by Colombian military personnel.

OPEC's decision on March 5 to leave the group's production target unchanged at 29.67 million b/d did little to calm market sentiments. OPEC continues to contend that the market is well supplied and the buoyant prices were the result of refinery bottlenecks, geopolitics and speculation. Crude prices actually rallied and surpassed US\$111/bbl in the wake of the meeting as the decision signalled the need for larger crude inventories as a buffer against geopolitical risks for the major consuming countries.

It is extremely difficult to determine the course of the oil market in the coming months. There are just as many upside risks as there are downside factors. On the upside, a full-blown US recession could temper oil demand and cause prices Conversely, if the decoupling to fall. theory holds, robust oil demand growth in non-OECD countries could place additional pressure on oil prices. There is also a view that the US dollar will decline further as the financial crisis in the US deepens.

#### **Natural Gas**

During the first quarter of 2008, natural gas prices (Henry Hub) averaged US\$8.65 per million British terminal units (mmbtu). This represented an increase of 23.6 per cent from the previous period and an increase of 19.9 per cent when compared to the average price for the first quarter of 2007. Prices were buoyed by exceptionally cold weather and news of depleting stocks in the United States (US). The winter withdrawal season was 6.3 per cent colder than last year and 4.2 per cent colder than the 10-year average. This created a stronger-than-expected demand for stored gas. In fact, a cold spell in late January prompted a record pull from gas inventories of 274 billion cubic feet (bcf), as this was the coldest week in seven years in the US. Temperatures in the very next week brought about another large withdrawal from inventories (200 bcf). As a result, US gas storage ended the winter withdrawal season at a surplus of a mere 6 bcf over the 5-year average. The end-ofwithdrawal storage level of 1.248 trillion cubic feet (tcf) was 304 bcf or approximately 20 per cent lower than a year earlier. This substantial deficit has the potential to adversely affect natural gas prices going forward. Even in the event that this year's injections manage to keep pace with that of the last two recordhigh seasons, inventory levels would still not be sufficient to provide comfort to the market. Any adverse weather-related disruptions pose a significant risk to replenishing inventories to adequate levels. Adding to this sentiment were the concerns that storage injections may be lower in 2008 given US-UK price

convergence. This has resulted in fewer LNG cargoes destined for the US. In February 2008, imports were the lowest in the last four years, resulting in a tighter supply scenario.

In Europe, UK prices at National Balancing Point were remarkably stable in March despite a series of major threats to while Asian markets were supply characterized by sustained high prices. Europe's growing appetite for natural gas is attracting interest from a number of producers. Two of the biggest projects, the South Stream Pipeline (promoted by the Russia's Gazprom and Italy's Eni) and the Nabucco Pipeline from Turkey to Austria, are targeted at Europe's growing gas demand. These may help to bring a level of ease to the high-priced European market.

Six new gas-receiving terminals with a combined capacity exceeding 8 bcf/d are carded for construction in North America in 2008, though the supply to fill them is still uncertain. Thus far, a new terminal was commissioned in Louisiana. This new terminal has an installed capacity of 2.6 bcf/d and there are plans to increase output to 4.3 bcf/d the following year. This will make the facility the largest receiving terminal in North America. A seventh LNG train with a capacity of 8.5 metric tonnes per year (mt/y) is also carded for construction in Nigeria. The plant is designed to accommodate an eighth train at a later stage.

#### Nitrogenous Fertilizers

#### Ammonia

In June 2008, Ammonia prices, pushed by high crop and energy prices surpassed the all time high set in 1974. Crop prices were driven by low inventories of grains and increased demand for selected crops for biofuel production, while energy prices were buoyed by declining crude oil inventories as well as increased Ammonia prices geopolitical tensions. averaged US\$517.63 per tonne (fob Caribbean) during the first quarter of 2008. This was 76.0 per cent above the price recorded during the fourth quarter of 2007, and 62.8 per cent above that for the same period a year earlier. Virtually all fertilizer products and raw material prices have continued to increase significantly since mid December 2007.

The year 2008 began with ammonia in very tight supply due to increasing import demand in the US as well as some constraints on export supply. Demand in the US rose on account of replenishment activity after a copious fall season and the expectation of strong spring demand. At the same time, supplies tightened because of shortfalls in Trinidad and Tobago and the Middle East. Industrial action at the Yara plant in January and mechanical problems and a turnaround at PCS Nitrogen (both in Trinidad and Tobago) caused a curtailment of production, while turnarounds and shutdowns in the Middle East resulted in falling exports from the region.

In February, ammonia prices were buoyant, while urea prices were relatively weak. This resulted in urea production cutbacks in favour of additional ammonia export sales. However, a weaker ammonia market in the following month together with a recovery in urea prices succeeded in reversing the trend. Ammonia prices began to show signs of weakness in March as demand declined. Also, export availability improved since plants that were closed for maintenance or technical reasons came back onstream. New capacity was also recently commissioned in February/March in Iran. This new plant has a capacity of 677,000 tonnes per year (t/y), while 660,000 t/y of new capacity is due to commence operations in Egypt in the third quarter of 2008. In the face of higher crop and energy prices, whether these new projects will assist in subduing the market is unclear.

#### Urea

Over the period, urea was traded at an average price of US\$367.97 per tonne (fob Caribbean). This represents a marginal increase (0.1 per cent) from the previous quarter but a rise of 19.3 per cent over that of the first quarter of the preceding year. Prices were falling in early 2008 as buyers left the market awaiting price corrections following the high priced environment of December 2007. In the presence of falling demand, this served to relieve some of the upward pressure on prices. Chinese producers were diverting supplies increasingly from export opportunities to local distributors for the winter wheat application season beginning in February. Prices continued to fall until they bottomed out in mid February, when buyers returned to the market. At this point, global urea prices began to show signs of rebounding. Prices in the US and in Asia were up sharply throughout March, though market fundamentals seemed to be relatively weak.

#### Methanol

Methanol prices were very buoyant during the quarter. The average price of US\$728.33 per tonne (fob Rotterdam) was an increase of 31.9 per cent from the preceding quarter and a rise of 33.0 per cent from the corresponding period a year Supply problems during the earlier. second and third quarters of 2007 created a scenario which supported drastic price movements, especially in the US, where prices set new records in the process. The arbitrage opportunities of shipping methanol to the US and to Europe which emerged were to the benefit of Asian producers and traders.

Over the period, spot prices were weaker but contract prices remained firm. Spot prices decreased sharply at the beginning of January. Contract prices in the US Gulf and Asia fell slightly in February but remained significantly higher than spot prices. This was the first announced decline in contract prices since July 2007. The month of February also witnessed a plateau and then the subsequent uptick of spot prices. The initial decrease in spot prices was caused by the availability of a large amount of imported material in the US in December/January, an improved supply situation as compared to the second half of 2007 as well as decreased activity in some derivative markets.

However, an outage at the M5000 plant in Trinidad and Tobago in February and a persistent shortfall from Methanex in Chile did not overtly compromise supplies to North America. In February and March, no new production problems were reported in Europe, but spot prices began declining once-more in early March after several weeks of flat prices.

#### Iron and Steel

Global iron and steel prices increased significantly over the three-month period following strong demand, higher raw material costs and declining Chinese exports during the last six months. Billets traded at an average price of US\$621.67 per tonne (fob Latin America) while wire rods fetched an average price of US\$727.08 per tonne (fob Latin America) over the period. When compared to the previous quarter, billets and wire rods increased by 24.3 per cent and 30.8 per cent, respectively. Compared to the average price recorded for the first quarter of 2007, prices in the current period were higher by 39.3 per cent and 52.9 per cent, respectively.

Following a continued downward trend of Chinese steel exports, industry experts were of the view that Chinese exports may decline by as much as 20 million tonnes in 2008. Imported strip prices in the EU rose sharply as supply remains tight due to a dearth of Chinese steel. The Chinese government is making minor headway in cooling the local industry as 15.21 million tonnes of outdated crude steel capacity was closed last year. However, this was less than half of the target of 35 million tonnes set by the Chinese officials. Similarly, 29.4 million tonnes of ironmaking capacity was closed during the year, just short of the target of 30 million tonnes. The Anhui province in China has even cut off the electricity supply to some steel mills in an effort to speed up the elimination of iron and steel capacity. However, 77.76 million t/y of obsolete steel-making capacity and 89.17 million t/y of obsolete iron capacity still remain. In a bid to curb an overheating economy and rising inflation, the Chinese Central Bank has raised the bank reserve ratio eleven times and increased the interest rate six times since the beginning of 2007. According the Chinese Iron and Steel Association (CISA), China's steel demand growth may slow to 10 per cent in 2008 should the money supply tighten further.

Import prices in the US continued to rise rapidly while traders were considering when the bubble would burst. Electrical steel users saw prices rise by more than 20 per cent. In the Commonwealth of Independent States (CIS), billet and debar prices surged by as much as \$120 per tonne. Based on strong demand, CIS exporters also raised wire rod offer prices. Increased raw material prices in Turkey brought about price increases for scrap and debar, while rebar prices hit an alltime high of US\$840 per tonne. Iron and steel prices are not showing any signs of decline despite the falling trend in Chinese exports. Going forward, a continuing trend of falling Chinese exports as the Chinese government seeks to tame the economy should bring about some retreat in price.

1 The Index of Domestic Production has been rebased to 1995 = 100. One sector has been renamed Oil and Natural Gas Exploration, Production and Refining. Additionally, Petrochemicals and Water are now included in the Index. 2 Energy refers to petrochemicals, oil and natural gas exploration, production and refining and related products.

# INDEX OF DOMESTIC PRODUCTION 1,2

1 The Index of Domestic Production has been rebased to 1995 = 100. One sector has been renamed Oil and Natural Gas Exploration, Production and Refining. Additionally, Petrochemicals and Water are now included in the Index. 2 Energy refers to petrochemicals, oil and natural gas exploration, production and refining and related products.

# PRODUCTION AND SALES OF CRUDE PETROLEUM AND PETROLEUM BASED PRODUCTS

May 2008

#### (nb. Figures may not add up due to rounding)

<sup>1</sup> Refers to accounts of the Consolidated Fund, Unemployment Fund, Road Improvement Fund, the Infrastructure Development Fund and the Interim Revenue Stabilisation Fund.

<sup>2</sup> Capital Revenue omits the proceeds from the divest ment of state-owned enterprises, which are recorded as part of the Financing category. Divestment proceeds of \$250 million in September 2002 were received from the sale of shares in National Enterprises Ltd. (NEL).

<sup>3</sup> Includes an adjustment for Repayment of Past Lending.

<sup>4</sup> Figures exclude the repayment of loans from the IDB and the EIB received by the government but onlent to the energy sector.

<sup>5</sup> Includes errors and omissions, advances from the Central Bank and drawdowns from the treasury deposit accounts. Negative numbers represent an increase in deposits at the Central Bank.

SOURCE: Central Bank of Trinidad and Tobago

1 Includes Sepcial Deposits. Effective December 28, 2005 the interest rate paid on special deposits was reduced to zero per cent. Effective December 28, 2005, commercial banks placed an aggregate of TT\$1,000 million in an interest bearing deposit account at the Central Bank. On 23 June, 2006 an additional TT\$500 million was placed into the account. Effective October 4, 2006, a Secondary Reserve Requirement equivalent to 2.0 per cent of the prescribed liabilities was introduced.

2 Cash: Includes Local Cash in Hand plus Balances (Total Depsoits with the central bank minus Special Deposits).
 3 FirstCaribbean International Bank (Trinidad and Tobago) Limited was granted a licence to carry on the business of banking with effect from May 28, 2007; Bank of Baroda (Trinidad and Tobago) Limited with effect from October 3, 2007.

SOURCE: Central Bank of Trinidad and Tobago

Annual data refer to the quarterly averages for the respective year.
 Data are weighted averages of the monthly discount rates for issues occuring during the period.
 See article on the 'The Floating Exchange Rate - Some Statistical Issues' Quarterly Economic Bulletin, Dec. 1993.
 Includes Finance Companies, Merchant Banks, Trust & mortgage Finance Companies. Data represents rates for reporting institutions only.

SOURCE: Central Bank of Trinidad and Tobago

With effect from January 1993, the valuation of Central Bank's liabilities under the Use of Funds Credit is based on the current SDR/US market exchange rates. Previously, this valuation was calculated at a constant accounting rate of SDR 1 = US\$ 1.30.
 With effect from April 13, 1993, Trinidad and Tobago shifted from a fixed exchange rate regime to a system whereby the par value of the Trinidad and Tobago dollar in terms of the United States dollar shall be based on prevailing market rates.

#### CALENDAR OF KEY ECONOMIC EVENTS

#### JANUARY - MAY 2008

#### JANUARY

7 The National Insurance (Rates of Contribution) Order, 2008 was made by the Board under section 56 of the National Insurance Act, Chap. 32:01. Under this order, the Second schedule of the National Insurance Act was amended. (Legal Notice No. 17 of 2008)

The National Insurance (Rates of Benefit) Order, 2008 was made by the Board under section 56 of the National Insurance Act, Chap. 32:01. Under this order, the Third schedule of the National Insurance Act was amended. (Legal Notice No. 18 of 2008)

- **10** The Minister of Energy, the Honourable Conrad Enill announced the sale of 80 per cent of the Government's shares in the Trinidad Marine and Tobago Petroleum Company Limited (Trintomar) to EOG Resources Ltd for \$20 million. The remaining 20 per cent will remain under the control of the National Gas Company. The sale was motivated by need to boost hydrocarbon а exploration.
- **15** The secondary bond market electronic trading platform was launched. This was a collaborative effort between the Central Bank of Trinidad and Tobago and the Trinidad and Tobago Stock Exchange. The market is intended to facilitate the trading of Government fixed income securities.
- **18** The Minister of Finance, the Honourable Karen Nunez-Tesheira announced the Government's intention to write off TT\$1,398,646 in default loans for the Agricultural Development Bank (ADB). This money will be drawn from the Finance

(Supplementary Appropriation) (2007) Act, 2008. This funding was necessary as the ADB does not have the power to write off loans that are unrecoverable. The debt arose from client's death or non-payment of loans and the inability of the bank to locate clients.

- 22 The Governor of the Central Bank Mr. Ewart Williams presented the results of the National Financial Literacy Survey, at the National Financial Literacy Programme's first anniversary function. The survey was conducted between June – August 2007. It was intended to measure the financial intelligence of the population of Trinidad and Tobago.
- **25** The Central Bank of Trinidad and Tobago announced that the "repo" rate will be maintained at 8.0 per cent.
- **28** An Act to provide for the Supplementary Appropriation for the service of Trinidad and Tobago for the Financial Year ending 30<sup>th</sup> September 2007 of the sum of the issue which was authorized by the Appropriation Act 2007. This Act may be cited as (Supplementary Finance the Appropriation) (2007) Act, 2008 (Act No. 1 of 2008).

#### FEBRUARY

- 14 Republic Finance and Merchant Bank Limited acted as the lead arranger and manager for the TT\$1 billion subordinated fixed rate bond issued by Republic Bank Limited. The bond carries a fixed rate of 8.55 per cent per annum, with a ten year tenor. The proceeds of the bond will be used to fund the Bank's asset growth.
- **18** Ansa McAl announced that its subsidiary Ansa Merchant Bank established an official partnership

with UK-based Schroders Private Bank. Under the agreement terms, ANSA Merchant Bank will distribute Schroders investment products and services. The relationship between Ansa McAl and Schroders Private Bank first started in 2003, with Schroders managing money for Tatil Life Assurance Ltd. Schroders Private Bank is a family controlled global asset management company, with £130.6 billion under management as at March 31, 2008. It was established in 1804 and is listed on the London Stock Exchange.

22 The Central Bank of Trinidad and Tobago announced an increase in the "repo" rate by 25 basis points to 8.25 per cent from 8.00 per cent. The cash reserve requirement applicable to commercial banks was also raised by 2 percentage points to 13 per cent. The Central Bank undertook these measures in light of the larger than expected jump in inflation, and in an effort to dampen any increase in inflationary expectations.

#### MARCH

- 14 The concessions and licenses that allowed Laqtel Limited to provide mobile telecommunications services were cancelled on this date. The Minister of Public Administration, the Kennedy Swaratsingh Honourable took this action after Lagtel repeatedly failed to to start providing mobile telecommunication services, and to pay a performance bond and other fines The Telecommunications Authority of Trinidad and Tobago in response to the Minister's actions, levied on Lagtel's assets, removing \$970.000 worth of electronic equipment, the approximate amount of the fine.
- 18 Neal & Massy (N&M) announced the acquisition of majority shareholding in Barbados Shipping & Trading (BST), and that it now owned 73.9 million shares or 97 per cent. N&M must now purchase the remaining 3 per cent from minority shareholders. N&M purchased the majority of shares at Bds\$9.04 per share, with a final

figure of the acquisition costing Bds\$496 million or TT\$1.6 billion.

**28** At the shareholder's meeting, RBTT Financial Holdings (RBTT) shareholders voted to sell RBTT to the Royal Bank of Canada (RBC). RBC will pay approximately TT\$14 billion or US\$2.2 billion for RBTT. The vote was carried by 98 per cent of RBTT's 16,786 shareholders, with them accepting an offer of TT\$40 per RBTT share. This offer will be paid with TT\$24 cash and TT\$16 worth of RBC ordinary shares.

The Central Bank of Trinidad and Tobago announced that it will keep the "repo" rate unchanged at 8.25 per cent.

#### APRIL

- The Trinidad and Tobago Stock Exchange Limited began trading daily, rather than three times a week. The Stock Market will open to trade every business day from 7:30 a.m. - 12 p.m. except on Carnival Monday, Carnival Tuesday and public holidays.
- 10 The Tourism Development (Approved Tourism Project)(Stonehaven Villas Limited) Order, 2008 was made by the Minister of Tourism under section 16 and 17 of the Tourism Development Act, Chap. 87:22. Under this order, Stonehaven Limited Villas was declared an approved tourism project. As an approved tourism project, the owner of Stonehaven Villas Limited is entitled to several tax benefits, such as a 5 year tax exemption on gains or profits. Stonehaven Villas Limited is also entitled to a capital allowance at the rate of one-fifth of TT\$36,864,743.00 for five accounting periods between September 23, 2006 and September 22, 2014. (Legal Notice No. 56 of 2008).

The Tourism Development (Approved Tourism Project)(Paria Suites Hotel) Order, 2008 was made by the Minister of Tourism under section 16 and 17 of the Tourism Development Act, Chap. 87:22. Under this order, Paria Suites Hotel was declared an approved tourism project. As an approved tourism project, the owner of Paria Suites Hotel is entitled to several tax benefits, such as a 5 year tax exemption on gains or profits. Paria Suites Hotel is also entitled to a capital allowance at the rate of onefifth of TT\$14,325,892.00 for five accounting periods between April 1, 2011 and March 30, 2019. (Legal Notice No. 55 of 2008).

The Tourism Development (Approved Tourism Project)(Salybia Village Spa Limited trading as Salybia Resort and Spa) Order, 2008 was made by the Minister of Tourism under section 16 and 17 of the Tourism Development Act, Chap. 87:22. Under this order, Salybia Village Spa was declared an approved tourism project. As an approved tourism project, the owner of Salybia Resort and Spa is entitled to several tax benefits, such as a 5 year tax exemption on gains or profits. Salybia Village Spa is also entitled to until March 2014, an accelerated depreciation at the rate of twenty per cent for five accounting periods from January 2007 on depreciated equipment owned by the hotel operator and used in the approved tourism project. (Legal Notice No. 54 of 2008).

- 11 The Works and Transport Minister, the Honourable Colm Imbert, and the National Infrastructure Development Company (NIDCO), signed a contract with the Trinitrain Consortium to design-build-operate and maintain the Rapid Rail system. The first phase of the rail should be operational by 2012. French companies Bouyges Travaux Publics, Alstom Transport, Alstom Transport TT and RATP Development comprise Trinitrain.
- **25** The Central Bank of Trinidad and Tobago announced that the "repo" rate will remain at 8.25 per cent.

#### MAY

- The 1 Agriculture Minister, the Honourable Arnold Pigott announced that the Government had approved the establishment of four large farms on 556 acres of land. These farms are intended to boost local agriculture and curb rising food prices. The farmers will be growing tree crops, root crops, livestock and rice at these locations. The farms will be developed in the following allotments: Picton (241 acres), Edinburgh (115 acres), Caroni (100 acres) and Orange Grove (100 acres).
- 12 The Minister of Works and Transport, the Honourable Colm Imbert announced an eight year \$25 billion road network programme. This programme will be partially financed by the Government. The programme will involve extension work on current roadways and the construction of new highways.
- **17** The Federation of Indian Export Organisations signed a memorandum of understanding (MOU) with the Greater Tunapuna Chamber of Industry and Commerce. This agreement seeks to develop and promote bilateral trade between India and Trinidad and Tobago.
- 28 The Governor of the Central Bank of Trinidad and Tobago gave Notice that in accordance with section 25(1) (b) of the Financial Institutions Act, 1993, that the Central Bank of Trinidad and Tobago prescribes the following ratios of the cash reserve balance to the total prescribed liabilities for all licensed commercial banks shall be thirteen per cent, and the ratio of cash reserves balance to the total prescribed liabilities of non-bank financial institutions shall be nine per cent. (Legal Notice No. 96 of 2008).

**29** Talisman (Trinidad) Petroleum Ltd (TTPL) announced on its website that it will be exiting the local market and selling its asset company. The company cited no potential for growth

as the reason. TTPL reason has a 25 per cent interest and shares in the offshore Angostura development with BHP Billiton and Total Energy.
