## Review of economic and financial developments

January 2019

## Part I - Overview and Outlook

## Overview

Global economic growth lost momentum in the third quarter of 2018 . Though the growth outturns for the United States (US) and United Kingdom (UK) economies remained solid, economic activity was fragile in other major Advanced Economies (AE) and Emerging Market and Developing Economies (EMDE). Oil producers benefitted from upward momentum in the crude oil market owing to geopolitical concerns. Economic activity in the Latin America and Caribbean (LAC) region was also subdued during 2018, as a result of NAFTA-related trade uncertainty in Mexico, contractions in Argentina's growth, strikes in Brazil and continued political and social instability in Venezuela. Inflation rates remained modest among several of the AEs and EMDEs in the fourth quarter of 2018 while rates in the LAC region where generally contained.

In Trinidad and Tobago, the energy-based recovery continued into the third quarter of 2018, but at a slower pace than the first half of the year. The observed decline in crude oil production was consistent with the maturation of the oil fields. While natural gas output rose, the recorded (year-on-year) growth rate in the third quarter was small relative to the previous two quarters; this reflected the impact of the third quarter 2017 start of bpTT's Juniper project on natural gas production. Outside of energy, the performance of several other available indicators monitored by the Central Bank, notably in construction and distribution, remained relatively muted.

The latest official data from the Central Statistical Office (CSO) indicated slackening labour market conditions during the final
quarter of 2017 compared to one year earlier. The unemployment rate increased to 4.4 per cent in the fourth quarter of 2017. This reflected a reduction of 12 thousand in the number of persons employed, accompanied by a decrease in the labour force of approximately 7.6 thousand persons. There is likely to be further softening of employment conditions in 2018, given job losses following the closure of the Petrotrin refinery and reported job losses in the communications sector.

Low inflationary conditions persisted during the second half of 2018, a combination of measured growth in aggregate demand, monetary policy that managed liquidity conditions carefully, and low imported inflation. Headline inflation measured 1.1 per cent in December 2018, down from 1.2 per cent in July. The suppression of overall prices was led by declines in food prices while core inflation was relatively stable.

The Central Government's fiscal consolidation efforts resulted in a much lower deficit in FY2017/18. Provisional estimates from the Ministry of Finance show that the Central Government fiscal accounts realized an overall deficit of $\$ 5.4$ billion. This compares with a deficit of $\$ 13.5$ billion in FY2016/17. The smaller deficit, which was financed by a combination of domestic and external borrowings, reflected an increase in revenue and a decline in expenditure. In December 2018, total public sector debt (net of open market operations) increased to \$98.9 billion (62.2 per cent of GDP) from the $\$ 95.5$ billion ( 61.0 per cent of GDP) outstanding at the end of September 2018. New domestic borrowings by the Central Government amounted to $\$ 1.7$ billion while a $\$ 640$ million bond was refinanced.

The Central Bank kept the repo rate at 5.00 per cent in December 2018, where it had been since a 25 basis point increase in June 2018. In taking this decision, the Bank continued to weigh considerations of external balance-particularly given rises in US interest rates-with the fact that domestic inflation was very low and the economy was still in an early stage of recovery. Meanwhile, the timing of open market operations in late 2018 took into account the impact of the public sector financing requirements on liquidity. In August, in keeping with its aim to move towards more market-based monetary instruments, the Central Bank removed the secondary reserve requirement on banks' deposit liabilities. Though foreign exchange inflows rose as a result of improved energy sector performance, the market for foreign exchange remained tight throughout 2018.

The movement in international reserves indicates that the external accounts recorded an overall deficit of $\$ 351.0$ million ( 6.0 per cent of GDP) in the third quarter of 2018. At the end of September 2018, gross official reserves amounted to $\$ 7,465.3$ million or 8.1 months of prospective imports of goods and services. The current account surplus narrowed to $\$ 68.3$ million or 1.2 per cent of GDP in the third quarter of 2018 from $\$ 78.9$ million in the same period a year earlier. This was driven by a 12.3 per cent jump in total imports, which outweighed a more modest increase in exports. Meanwhile, the financial account registered a net outflow mainly due to the direct and other investment accounts.

## Outlook

The global economy is anticipated to slow further in 2019. Economic growth in AEs is expected to be weighed down by waning fiscal stimulus in the US and the effects of trade protectionist actions. EMDEs are expected to face a more challenging external environment in 2019 due to softening external demand,
tightening financial conditions and heightened policy uncertainties. However, despite the tepid economic activity in the LAC region in 2018, both the International Monetary Fund (IMF) and the Economic Commission for Latin America and the Caribbean (ECLAC) project a pick up in the region in 2019. Overall, the IMF, in its January 2019 World Economic Outlook (WEO) Update, forecasts world economic growth at 3.5 per cent in 2019, a 0.2 percentage point reduction from its previous forecast in October 2018. However, the recent signing of the US-Mexico-Canada trade agreement (USMCA) (although it is still to be ratified by the US Congress) and the prospect for weaker energy prices in the short-term may help to alleviate threats to global growth.

The domestic economy should receive a boost in 2019 from the anticipated startup of the Angelin gas platform during the first quarter and other energy projects in the pipeline. This will complement the boost to the energy sector from the Juniper field. Non-energy activity in 2019 is likely to be propelled by the seasonal acceleration in the execution of Government's capital programme in the second half of the fiscal year (April-September). Conditions in the labor market could remain challenging given ongoing adjustments in public and private sector entities, and the need for new skill sets among workers in dealing with more intense competition domestically and from external sources. Inflation is expected to remain low but the forecasted harsh dry season could lead to a rise in the cost of local produce. There are also important downside risks in 2019 that can affect the Trinidad and Tobago economy which are related to uncertainty on the international front-including developments in nearby Venezuela, tensions among major trading nations, volatility in energy prices, Brexit, and swings in financial market earnings. Domestic macroeconomic management will need to be closely coordinated and alert in dealing with a rapidly evolving external landscape.

## Part II - International and Regional Economic Developments

## International Economic Developments

Global economic performance cooled in the third quarter of 2018, following a loss of momentum in the first half the year. Among AEs, growth has become more uneven (Table 2). The US economy continued to record robust growth (3.0 per cent year-on-year) as fiscal policy bolstered consumer spending and investment in the third quarter of 2018. Against the backdrop of solid economic growth and a strong labour market, the Federal Reserve increased its benchmark interest rate-the federal funds rate—by 25 basis points to 2.25-2.50 per cent at their December 2018 meeting. The expansion in the UK economy during the third quarter of 2018 was led by higher household consumption, though business investment was negatively affected by the uncertainty surrounding the country's impending exit from the European Union (EU) in March 2019 and the growing possibility of a "no deal" Brexit. In the Euro Area, the pace of economic activity eased, primarily due to softening exports. Historically low unemployment rates were recorded in the Euro Area and the UK during the third quarter of 2018
(Table 3) despite the uncertainty of Brexit.
Growth generally decelerated in EMDEs in the third and fourth quarters of 2018 primarily due to weaker demand. The ongoing tariff disputes between China and the US have contributed to a slowdown in China's economic activity in the fourth quarter of 2018, to its weakest pace in almost a decade (Table 4). However, in December 2018, the US agreed to postpone the increase in tariffs on US $\$ 200$ billion of Chinese products- to 25.0 per cent from 10.0 per cent-which was initially intended to take effect on January 1, 2019. Real GDP growth in Russia eased in the third quarter of 2018 as retail trade, cargo turnover and industrial production slowed coupled with contractions in agriculture and construction activity. India's economic activity also weakened in the third quarter of 2018, reflecting a reduction in consumer spending. In Brazil, real GDP expanded in the three months ending September 2018 owing to a rebound in investment and government spending. In the LAC, growth has moderated amid trade tensions, volatile commodity prices and political uncertainty.

Inflation rates remained modest among several of the AEs and EMDEs in the fourth quarter of 2018. The Euro Area's inflation rate slowed in December 2018, resulting from reduced growth rates in the price of energy and food; and alcohol and tobacco. In the US, the core personal consumption expenditure price index (PCEPI) was slightly under the Federal Reserve's 2.0 per cent inflation target rate in November 2018 despite increases in spending on recreational goods, vehicles, household electricity and gas. In
contrast, UK's inflation rate remained above the Bank of England's target rate of 2.0 per cent in November 2018, although, due to a slowdown in the cost of transport, the rate has decelerated since September 2018 (Table 5). Among the EMDEs, inflation rates for Brazil, India and China decelerated in December 2018 due to price pressures on food and fuel. Meanwhile, Russia's inflation rate soared to its highest in 18 months, reflecting rising prices of food and services (Table $6)$.

## Box 1: External Trade Environment and the Implications for Trinidad and Tobago

The turbulent global trade environment during 2018 resulted in a loss of global growth momentum in 2018 compared to 2017. The muted expansion in economic activity in 2018 was partly reflective of escalating trade tensions between the US and key trading partners, the uncertainty surrounding the renegotiations of the North American Free Trade Agreement (NAFTA) and the prolonged unpredictability related to the UK's impending exit from the EU. Against this backdrop, the IMF revised downward its 2019 economic growth forecasts for the US,
UK, China and Mexico. Protectionist actions by the US and its largest trading partner, China continue to pose a downside risk to global growth in 2019.

The trade dispute between the US and China involved the US imposition of a 10.0 per cent tariff on all aluminum imports, a 25.0 per cent tariff on all steel imports and a 25.0 per cent tariff on US $\$ 50.0$ billion worth of other Chinese imports. Also, a 10.0 per cent tariff levied on US $\$ 200.0$ billion of imports from China was earmarked to be increased to 25.0 per cent at the beginning of 2019. The sectors targeted by US tariffs include products used for robotics, information technology, communication technology and aerospace. China responded with tariffs of an equivalent amount on US exports, covering goods such as soybeans, pork, fruits, cars and whiskey amongst others ${ }^{1}$. According to the $\mathrm{IMF}^{2}$, global GDP is expected to fall by more than 0.8 per cent in 2020 and remain roughly 0.4 per cent lower in the long run compared to the baseline scenario without trade tensions. The disruption caused by the escalation of trade restrictions could be particularly large in the US and China, with GDP losses of more than 0.9 per cent in the US and over 1.6 per cent in China in 2019. Following the December 2018 Group of Twenty (G-20) summit, a 90-day halt on additional trade measures was agreed upon by the US and China to facilitate trade negotiations.

At the same meeting, the renegotiated NAFTA, renamed the United States-Mexico-Canada Agreement (USMCA), was signed. Although not yet ratified by member countries, the signing of the agreement has lowered a key downside threat to global economic growth. The USMCA will replace the 25-year old NAFTA, with the biggest changes emanating from rules governing the country of origin, labour provisions, the US access to the Canadian dairy market, intellectual property and digital trade, tariff protections, and a sunset clause. Before the signing of the new agreement, the IMF $^{3}$ simulated that GDP in the NAFTA trading partners was likely to be more than 1.6 per cent lower in 2020 than in the absence of US tariff measures.

Meanwhile, the uncertain outcome of Brexit has negatively impacted the UK's business investment in 2018. The UK's withdrawal from the EU would result in a reduction in its access to the EU market through higher trade barriers as it will no longer be a member of the Single Market trading bloc. In addition, the ability of the UK to export to third party countries under the EU's negotiated trade deals may also be compromised as the UK will lose access to trade agreements that it had by virtue of being an EU member. However, the net impact on trade will depend on the terms and conditions of the withdrawal agreement.

[^1]
## Box 1: Cont'd External Trade Environment and the Implications for Trinidad and Tobago

Trade frictions and the lower potential growth of these economies have several implications for Trinidad and Tobago. Over the period 2011 to October 2018, the US accounted for an average of 38.5 per cent of Trinidad and Tobago exports (Figure B1) while the UK, EU, China and Mexico collectively accounted for an average of 4.4 per cent of Trinidad and Tobago's exports over the same period. As a result, reduced demand for Trinidad and Tobago's exports from these countries can significantly impact the domestic economy. Trade in services (particularly travel services) may also be negatively impacted by reduced external demand since visitor arrivals in Trinidad and Tobago have been mainly dominated by the US. In addition, OPEC (2018) ${ }^{4}$ noted that the decline in oil prices in October and November 2018 was due, among other things, to slowing global economic momentum amid US-China trade tensions. Lower energy prices could lead to a potential reduction in Trinidad and Tobago's export earnings and a deterioration of the surplus on the external current account. Trinidad and Tobago's exports may also suffer from the Brexit outcome given that the UK's growth is anticipated to decelerate post-Brexit, and particularly if the EU-CARIFORUM Economic Partnership Agreement is to be renegotiated.

On the other hand, the imposition of tariffs on US goods by China may create opportunities for Trinidad and Tobago to increase its exports of similar goods to the Chinese market. The Chinese government imposed a 10.0 per cent tariff on US Liquefied Natural Gas (LNG). Of particular interest, China is the world's second largest natural gas importer, whilst Trinidad and Tobago is in the world's top 10 exporters of $\mathrm{LNG}^{5}$. As such, the higher cost of US LNG can push China to substitute to LNG from Trinidad and Tobago. While Trinidad and Tobago's main export commodities continue to be energy or energy-related products, opportunities for the promotion of non-energy exports also exist. Following exports of mineral fuels and chemical products, manufactured commodities represent the third largest category of exports from Trinidad and Tobago in 2018 ${ }^{6}$, with the USA accounting for approximately 80.0 per cent of domestic manufacturing exports. A national thrust into the development of these export categories can facilitate greater sustainability in export earnings for the domestic economy.

## Regional Economic Developments

Economic growth in the LAC region was subdued in the third quarter of 2018 (Table 7). The IMF, in its January 2019 WEO Update, estimated an economic outturn of 1.1 per cent in 2018, a reduction of 0.1 per cent from its previous forecast in October 2018. The downward revision was predicated on lower private investment in Mexico and an even more severe contraction in Venezuela than previously anticipated. Amid the subdued economic growth, inflation rates in Colombia, Chile and Peru remained contained within their respective inflation rate target ranges as at December 2018. In contrast, Mexico's inflation rate consistently exceeded the upper bound of the Central Bank of Mexico's inflation target of 4.0 per cent, driven by the pass-through effect from the depreciation of the peso coupled with faster price increases for energy and food.

In the Caribbean, economic activity was mixed in Jamaica and Barbados. In the third quarter of 2018, Jamaica's economic growth expanded by 1.8 per cent (year-on-year), its second highest quarterly growth rate over the last two years. Meanwhile, real GDP contracted by 1.3 per cent in Barbados for the three months to September 2018. However, an improvement in growth is anticipated over the medium term as the

Government has entered into a precautionary 48-month Extended Fund Facility (EFF) with the IMF to aid with restoring macroeconomic and debt sustainability. The IMF approved the EFF on October 1, 2018, with access of Special Drawing Rights (SDR) 208.0 million (US $\$ 290.0$ million).

## Although the indebtedness of Caribbean

 economies remains relatively high, international credit rating agencies upgraded the credit ratings for Barbados and Jamaica. In November 2018, Barbados' credit rating was upgraded for the first time in a decade as Standard and Poor's (S\&P) raised its long and short-term local currency ratings to $B-/ B$ from selective default (SD). The upgrade was based on the government's implementation of the Barbados Economic Recovery and Transformation (BERT) plan and the recent attainment of financing from multilateral lending institutions such as the Caribbean Development Bank (US\$75.0 million) and the Inter-American Development Bank (US $\$ 100.0$ million). However, S\&P indicated that the foreign currency rating will remain at 'SD' until Barbados resolves its foreign currency debt exchange (Table 8). In September 2018, S\&P revised Jamaica's outlook from stable to positive, and affirmed the country's short and long-term sovereign credit ratings at B.Table 7

Notes:
1 Data are unavailable for the Eastern Caribbean Currency Union (ECCU).
2 Credit ratings are not available for Guyana and the ECCU. Individual credit ratings are available for selected member countries of the ECCU.
3 Data for 2018 for Barbados are as follows: balance of payments data are for January-September 2018, real GDP growth data are for the third quarter of 2018, inflation data are for September 2018 and import cover data are for October 2018 and converted from 8.6 weeks to months.
4 Data for 2018 for Belize are as follows: balance of payments data are for the period January-June 2018, real GDP growth data are for the third quarter of 2018, inflation data are for October 2018 and import cover data are for October 2018.
5 Data for 2018 for Guyana are as follows: balance of payments data are for the period January-June 2018, real GDP growth data are for the first six months of 2018, inflation data are for October 2018 and import cover data are for June 2018.
6 Data for 2018 for Jamaica are as follows: real GDP growth data are for the third quarter of 2018, inflation data are for November 2018 and import cover data are for December 2018 and converted from 19.47 weeks to months.
7 Data for 2018 for the ECCU are as follows: inflation data are for September 2018.

## Part III - International Commodity prices

The Energy Commodity Prices Index (ECPI) increased 18.9 per cent (year-on-year) during the second half of 2018 . The overall index increased to an average of 100.57 over July to December 2018 from 84.62 over the same period in 2017 . The surge was led by a 24.1 per cent increase in West Texas Intermediate (WTI) crude oil prices but the improvement also featured double-digit growth in most other commodities in the index.

WTI prices increased to an average of US\$64.2 per barrel during second half of 2018 compared to US\$51.8 per barrel over the corresponding period of 2017 (Table 9). Upward momentum in the crude oil market during the second half of the year came from fears of crude shortages in November, when US sanctions on Iranian production were set to take effect. Strong crude prices over the period also drove the prices of
several derivative products in the ECPI including gas oil (19.5 per cent), motor gasoline ( 9.9 per cent) and jet fuel ( 22.8 per cent).

Henry Hub natural gas prices jumped 17.2 per cent during the period given relatively higher demand. The US Henry Hub price, which accounts for 40 per cent of the ECPI, averaged US $\$ 3.4$ per mmbtu during the second half of 2018, up from US\$2.9 per mmbtu a year prior. This pick-up was a result of a warmer-than-usual autumn in the US, which increased the demand for power for air-conditioning. This coupled with a series of nuclear power plant outages intensified the call on natural gas for power generation. Downstream commodities, ammonia and methanol in particular, also saw a significant jump in their prices over the period.

3 West Texas Intermediate.

## Part IV - Domestic Economic Activity

According to indicators monitored by the Central Bank, maintenance work by some companies and the ongoing maturation of oil fields dampened the recorded growth momentum in the energy sector in the third quarter of 2018 . On the nonenergy side the pickup in construction observed in the second quarter seemed to have reversed in the third quarter, but distribution and banking grew moderately, while manufacturing remained fairly stable. (Appendix Table 1).

## Energy ${ }^{7}$

Natural gas output rose by 1.0 per cent in the third quarter of 2018 (year-on-year). In addition to the impact of planned turnarounds at bpTT's Cassia and Immortelle facilities during September 2018, the sizeable year-on-year boosts in natural gas output from the Juniper project since August 2017 have waned as the base effect has run its course. Exploration and production activity on the whole was marginally lower, as there were also slips in crude oil production (11.3 per cent) and in depth drilled and rig days recorded. Nevertheless, LNG production increased moderately ( 1.2 per cent) despite maintenance work at Train 2 in September. Refinery throughput which was down by 7.0 per cent may have been affected by the winding down of operations at the Petrotrin refinery while natural gas liquids output is being affected by the production of increasingly 'drier ${ }^{\prime 8}$ natural gas. Petrochemical output was also generally weaker during the period. Methanol
production was affected by outages at the M5000 and Atlas methanol plants while downtime at Nutrien (formerly PCS Nitrogen) hampered the production of ammonia.

Preliminary data for the fourth quarter suggest that activity in the energy sector continued to be mixed with strong influences of maintenance works and temporary shutdowns on output of some products.

## Non-Energy

Indicators in the non-energy sectors in the third quarter of 2018 present a mixed picture suggesting that overall, a durable recovery outside of the energy sector is yet to take hold. Based on information on lower local sales of cement as well as reduced production of mined aggregate, the Bank's Quarterly Index of Economic Activity (QIEA) in the Construction sector is estimated to have declined by 6.4 per cent in the third quarter of $2018{ }^{9}$. However, growth in retail sales translated into Central Bank estimates of a 0.4 per cent increase in Distribution in the third quarter of 2018. Output in the Manufacturing sector is estimated to have been relatively flat (-0.2 per cent), mainly owing to lower reported activity in the Assembly industry ${ }^{10}$, Chemical Manufacturing industry ${ }^{11}$ and Miscellaneous Manufacturing, but activity increased in the Food, Drinks and Tobacco industry ( 3.6 per cent).

[^3]Meanwhile growth was recorded in the Commercial Banking and the Real Estate and Dwellings sub-sectors of the Index, in contrast to lower activity in the Insurance and NonBank Financial Institutions sub-sectors. Similarly, activity in the Transport, Storage and Communications sector is assessed to have
declined by 1.6 per cent, because of lower levels of activity within the taxi ( 4.5 per cent), truck ( 6.7 per cent) and airline ( 0.9 per cent) sub-industries. These declines together outweighed an 8.0 per cent improvement in port activity during the third quarter of 2018.

[^4]
## Employment

The latest data from the Central Statistical Office (CSO) indicated that the rate of unemployment increased while labour productivity improved. The unemployment rate increased to 4.4 per cent in the final quarter of 2017 , from 3.6 per cent in the corresponding quarter of 2016 (Table 11 \& Appendix Table 12). There was a reduction of 12.0 thousand in the number of persons with jobs while the labour force saw a loss of 7.6 thousand persons. The contraction in the labour force was reflected in a decrease in the labour force participation rate to 58.3 per cent at the end of 2017 from 59.0 per cent at the end of 2016. Increased numbers of unemployed persons within the construction; petroleum and gas; and community, social and personal services sectors helped to push the unemployment rate upwards towards the end of 2017 (Table 12 \& Appendix Table 13). In terms of gender, there was a larger year-on-year increase in the number of unemployed women (4.2 thousand women) compared with the increase in unemployed men ( 0.2 thousand men) (Table 11). The youth (persons aged 15-24 years old) unemployment rate (7.7 per cent) continued to be disproportionately higher than the average unemployment rate for persons in the 25-64 years age category ( 4.2 per cent).

## Despite the relatively low rate of unemployment recorded in 2017, there remains considerable

labour market 'slack ${ }^{\mathbf{1 2}}$. In lieu of official labour market data, the Bank uses indicators, such as retrenchment notices ${ }^{13}$ and print media advertisements ${ }^{14}$ to monitor overall labour market conditions. According to the Ministry of Labour and Small Enterprise Development, the number of persons retrenched increased by 38.0 per cent during 2018 (Chart I). Most of these retrenchments occurred in the Transport, Storage and Communication (589); Finance, Insurance, Real Estate and Business Services (295); Petroleum and Gas (including production, refining, and service contractors) (258); and Manufacturing (171) industries. Added to this were reports of job cuts by Petrotrin of approximately 5,000 workers. At the same time, the decline in the number of job advertisements ( 22.1 per cent) published in the print media during 2018 suggests that the demand for labour has diminished.

## Productivity

## The Index of Productivity ${ }^{15}$ increased by 14.3

 per cent (year-on-year) in the third quarter of 2018, the third successive quarterly increase (Appendix Table 3B). Excluding the energy sector, the overall Index of Productivity increased by 22.1 per cent (year-on-year) during the third quarter of 2018 . This positive outturn was driven mainly by higher production in the food processing (25.4 per cent); and drink and tobacco (40.3 per cent) industries (Appendix Table 2A). Meanwhile, within the energy sector,[^5]lower productivity was occasioned by declines in domestic production ${ }^{16}$, including in the natural gas refining ( 23.5 per cent) and petrochemicals (13.3 per cent) industries.

In general, wages remained stable given soft labour market conditions. During the third quarter of 2018, the Index of Average Weekly Earnings (AWE) ${ }^{17}$ (excluding energy) inched up 1.1 per cent. However, a 31.0 per cent increase in wages in the Oil Refining industry pushed the overall index up 11.0 per cent (year-on-year) when the energy sector is included.

[^6]Part VI - Domestic Prices

## Retail Prices

Low and stable inflationary conditions persisted into the second half of 2018. Headline inflation slowed from 1.2 per cent in July to 1.1 per cent in December and averaged 1.1 per cent over the six-month period (Chart II).

Core inflation, which omits the volatile food component, was relatively stable at 1.3 per cent. Notwithstanding, broad inflationary pressures were evident during the period including in the Transportation and Housing ${ }^{18}$ sub-indices. The increase in the price of super gasoline following the budget presentation in September influenced the Transportation sub-index upward to 2.8 per cent in October through December after stable growth of 2.0 per cent in the third quarter. The Housing sub-index rose by 3.3 per cent in the third quarter before moderating to 2.7 per cent during the fourth quarter. These upward influences were moderated by declines in several sub-indices including Furnishings ${ }^{19}$; Clothing and Footwear; and Alcoholic Beverages and Tobacco.

Food inflation was generally flat over the sixmonth period. This reflected growth of 0.7 per cent in July 2018, largely followed by declines through the rest of the period. The six-month window saw declines in several commodity prices which ultimately suppressed overall food inflation. Declines to vegetable prices in August ( -3.8 per cent); Food Products N.E.C ${ }^{20}$ in September (-9.7 per cent); fruit prices in October ( -1.2 per cent); and meat prices in December ( 6.1 per cent) were largely responsible for lower food prices over the period. Food inflation was flat ( 0.0 per cent) in December.

## Producers' Prices and Building Material Prices

Producer price inflation, as measured by the Producer Price Index $(\mathrm{PPI})^{21}$ of the CSO , was generally muted ( 0.3 per cent) in the fourth quarter of 2018. Most of the sub-indices reflected minimal price growth. The Index of Retail Prices of Buildings Materials on the other hand grew 3.8 per cent in the final quarter of 2018 year-on-year. All costs measured by the index increased in the fourth quarter of 2018, most notable being the 6.0 per cent increase in costs associated with electrical installation and fixtures. Some of the changes in the index were reflected in the housing sub-index of the Index of Retail Prices, though not significantly enough to impact headline inflation.

Chart II

## Part VII - Central Government Fiscal Operations

Fiscal consolidation efforts resulted in a much lower deficit in FY2017/18. Provisional estimates from the Ministry of Finance (MoF) show that the fiscal accounts achieved an overall deficit of $\$ 5.4$ billion ( 3.4 per cent of GDP) in FY2017/18 compared to $\$ 13.5$ billion in the previous year (Table 13). For FY2018/19, a deficit of approximately $\$ 4.1$ billion is projected The deficit is anticipated to be financed using a combination of domestic and external sources, including drawdowns from the Central Bank overdraft facility. Total revenue for FY2018/19 is projected at $\$ 47.7$ billion, supported by higher
energy and non-energy receipts. Meanwhile, total expenditure is estimated to reach $\$ 51.8$ billion reflecting higher spending on transfers and subsidies; goods and services; wages and salaries; and the capital programme. Some fiscal measures announced in the budget could provide inflationary impulses. Chiefly, the increase in the price of super gasoline to $\$ 4.97 /$ litre from $\$ 3.97$ / litre has added some direct impetus to headline inflation ${ }^{22}$. Second round effects may also ensue as the hike in the price of super gasoline may increase transportation costs.

p Provisional.
b Budgeted.

* The energy and non-energy breakdown is based on the Central Bank's computations. Energy revenues comprise oil revenues plus revenues from Petrochemical companies. Data for FY2019 is an estimate.

Part VIII - Public Sector Debt

Gross Public Sector debt amounted to \$124.6 billion at the end of December 2018, up from \$119.1 billion in September 2018 (Table 14). Net of sterilised securities, public sector debt increased to $\$ 98.9$ billion ( 62.2 per cent of GDP) at the end of December 2018 from the \$95.5 billion ( 61.0 per cent of GDP) outstanding at the end of September 2018.

Central Government domestic debt (excluding sterilised securities) increased by $\$ 960.0$ million to $\$ 43.3$ billion as at the end of December 2018. During the first three months of FY2018/19, the Central Government borrowed approximately $\$ 1.7$ billion from the domestic capital market comprising two bonds underwritten by First Citizens Bank Limited (FCB) in the amounts of $\$ 1.2$ billion and $\$ 500.0$ million, respectively. The bonds were issued to finance the closure of the Petroleum Company of Trinidad and Tobago (PETROTRIN)23 and to provide budgetary support. Additionally, a $\$ 640.0$ million domestic bond was refinanced at 5.45 per cent for 15 years with Republic Bank Limited (RBL). Meanwhile, CLICO zero coupon bonds in the amount of $\$ 470.9$ million matured in November 2018.

Central Government guaranteed borrowings increased over the first three months of FY2018/19. Contingent liabilities increased to $\$ 29.7$ billion at the end of December 2018 from
$\$ 28.5$ billion in September 2018. During the two-month period under review, PETROTRIN contracted the following short-term loans: US $\$ 50.0$ million from Scotia Trust \& Merchant Bank; US $\$ 100.0$ million and US $\$ 25.0$ million from FCB; and US $\$ 22.3$ million from RBL. The National Maintenance Training and Security (NMTS) Company contracted a short-term domestic loan of $\$ 400.0$ million with FCB. A US $\$ 99.6$ million domestic loan was contracted by the Urban Development Company of Trinidad and Tobago (UDECOTT) with ANSA Merchant Bank, of which US $\$ 54.7$ million was disbursed. The latter was arranged to finance construction works and the purchasing of equipment for the Arima Hospital. UDECOTT also refinanced a $\$ 180.3$ million domestic loan, which was contracted with NCB Global Finance Limited.

Central Government external debt outstanding increased marginally over the reporting period, amounting to $\$ 25.9$ billion (US\$3,733.7 million) at the end of December 2018 (Appendix table 16A). In November 2018, the Central Government received the second tranche of a US $\$ 300.0$ million loan (US $\$ 120.0$ million) contracted with the Corporación Andina de Fomento (CAF) ${ }^{24}$. The first tranche of US $\$ 180.0$ million was received in April 2018.

Part IX - Money, Credit and Interest Rates

The Bank kept the Repo rate at 5.00 per cent in December 2018 where it had been since the last increase of 25 basis points in June 2018. In arriving at its December decision, the Monetary Policy Committee considered that despite the further widening of the negative differential between yields on TT and US short-term treasury instruments and the potential negative effects on the domestic foreign exchange market, low inflation and a still weak economy justified holding the repo rate steady.

Liquidity levels in the financial system were higher in the second half of 2018 compared to the first half (Chart III). Excess liquidity ${ }^{25}$ in the financial system averaged $\$ 3.9$ billion daily over July to December 2018, compared with $\$ 2.6$ billion daily over the first half of 2018. This increase in excess liquidity came in spite of a decline in net domestic fiscal injections ${ }^{26}$ traditionally the major source of liquidity in the domestic economy - to $\$ 1.9$ billion during July to December 2018 from $\$ 7.8$ billion over the first half of the year. During the period under review, the Bank allowed roughly $\$ 193$ million in Open Market Operations (OMO) maturities to return to the banking system. Over July and August however, net OMO maturities amounted to $\$ 5.3$ billion. These injections facilitated the Government's issuance of $\$ 4.0$ billion in National Investment Fund bonds ${ }^{27}$ to the public in August 2018. In contrast, Central Bank open market operations led to net withdrawals of $\$ 1.1$ billion in the first half of the year. In keeping with its aim of moving to more indirect policy instruments, the Bank removed the 2 per cent secondary reserve requirement on banks' deposit liabilities in August. This action meant that $\$ 1.6$ billion in liquidity returned to the financial system.

While foreign exchange market transactions are not part of the Bank's liquidity management
programme, sales of foreign exchange to authorised dealers indirectly sterilised $\$ 4.9$ billion in liquidity over July to December, compared with $\$ 5.2$ billion over the first six months the year.

Given the increase in liquidity levels in the second half of 2018, interbank borrowing activity declined. After averaging $\$ 143.4$ million daily over the first half of 2018, interbank activity decreased to a daily average of $\$ 86.5$ million over July to December 2018. The average interbank rate remained at 0.50 per cent over 2018. The Central Bank's repurchase facility was accessed twice during the second half of the year, for a total of $\$ 1.9$ billion.

Chart III
Commercial Banks' Excess Reserves

Source: Central Bank of Trinidad and Tobago

## Although domestic short term rates improved

 in response to the increased Repo rate, the differential between the TT and US 91-day treasury rates remained negative. The rate on the TT 91-day OMO Treasury bill increased to 1.30 per cent over July to December 2018, while the rate on US 91-day Treasury bill rate increased by 42 basis points over the reference period to reach 2.45 per cent by the end of December. The 91-day differential therefore moved from 83 basis points below parity in July to 115 basis points below parity in December 2018.[^11]Commercial banks' median lending rates have responded slowly to the June 2018 increase in the Repo rate, with the median prime lending rate of commercial banks rising by 25 basis points to 9.25 per cent over July to September 2018. There were no further rises in the rate to the end of December (Chart IV). Meanwhile, commercial banks' weighted average lending rate declined to 8.11 per cent in September 2018 from 8.15 per cent in March. At the same time, continuing to display stickiness, the weighted average deposit rate remained at 0.64 per cent over the same period. As a result, the banking spread fell by 4 basis points to 7.47 per cent over the period March to September 2018. This decline in the weighted average lending rate likely reflected competition among commercial banks for credit business in a subdued economy (Appendix Table 26B).

Chart IV
Commercial Banks' Weighted Loan And Deposit Rate

Source: Central Bank of Trinidad and Tobago

After signs of a recovery early in 2018, growth in private sector credit remained firm between June and November 2018 (Chart V). On a year-on-year basis, lending to the consolidated financial system grew 5.8 per cent in November 2018 matching the growth rate in June 2018. The growth in consumer and real estate mortgage lending continued to shore up overall credit expansion while business lending remained subdued. Loans to consumers grew by 7.2 per
cent in November, marginally lower than the growth rate recorded in June 2018. Higher lending for debt consolidation and refinancing continued to support the expansion in consumer credit; however, this segment of credit may not be going into growth-enhancing activity. Lending for these categories remained strong since December 2017 as some consumers attempt to improve their financial positions. On the other hand, lending for motor vehicle purchases slowed to 1.3 per cent by the third quarter of 2018 compared to 2.8 per cent in the second quarter. This slowdown resulted from reduced lending for new and used private vehicles while loans for other vehicles declined. On a year-on-year basis, credit card lending grew 6.9 per cent in the third quarter compared to 7.3 per cent in the previous quarter.

Chart V
Private Sector Credit by the Consolidated Financial System (Year-on-Year Per cent Change)

Source: Central Bank of Trinidad and Tobago
Real estate mortgage lending, supported by a low interest rate environment and substantial competition among banks, expanded by 8.2 per cent in November compared to 8.9 per cent in June 2018. Residential real estate mortgage loans grew in November ( 5.2 per cent) somewhat slower than in June 2018 ( 6.7 per cent), while commercial real estate mortgages expanded (14.7 per cent) in November, up from 13.7 per cent in June 2018. Interest rates on new residential real
estate mortgages were more or less stable at 4.8 per cent in the third quarter of 2018 compared to 4.9 per cent in the second, while rates on new commercial mortgages eased to 6.7 per cent from 6.9 per cent.

After sixteen months of sluggish growth, business lending remained subdued in November 2018. On a year-on-year basis, lending to businesses grew by 1.8 per cent in November compared to growth of 1.1 per cent in June 2018. Disaggregated data to September 2018 showed growth in the Other Services sector along with the Finance, Insurance and Real Estate. On the other hand, there were declines in loans to the Manufacturing sector in the third quarter ( 14.9 per cent following a fall of 21.1 per cent in the second quarter) on account of a falloff in lending to businesses involved in chemical and non-metallic manufacturing, while loans to the Construction sector contracted by 4.6 per cent in the third quarter compared to a decline of 4.3 per cent in the second quarter of 2018.

Foreign currency loans fluctuated in 2018. On a year-on-year basis, foreign currency loans fell by 10.2 per cent in October 2018 following growth in both August and September. Foreign currency loans to businesses, which comprise approximately 95 per cent of total private sector foreign currency loans, declined by 17.5 per cent in November compared to a decline of 13.0 per cent in June 2018.

Foreign currency deposits continued to decline in 2018, albeit at a slower pace than the previous year. On a year-on-year basis, foreign currency deposits narrowed by 2.4 per cent in November compared to a decline of 3.3 per cent in June 2018. The gentler overall decline
occurred on account of a slower reduction in deposits by consumers ( 1.9 per cent in November compared to 4.1 per in June 2018) along with growth in business deposits (4.5 per cent in November compared to a decline of 6.5 per cent in June 2018).

The main monetary aggregates expanded in the second half of the year. With the elimination of the secondary reserve requirement in August, the resultant boost in liquidity led to a pick up in the main monetary aggregates. M1-A, defined as currency in active circulation plus demand deposits, increased in August and September by 4.0 per cent and 3.7 per cent respectively, reaching growth of 4.8 per cent by November. $\mathrm{M}-2^{28}$ expanded by 0.9 per cent in October and by 2.3 per cent in November 2018.

Though improved energy sector performance increased foreign exchange inflows, the market for foreign exchange remained tight throughout 2018. Increases were recorded in both authorised dealers' purchases from the public (13.7 per cent) and their sales to the public (9.3 per cent) (Table 15). Purchases of foreign exchange from the public by authorised dealers reached US\$4.1 billion. Approximately 66.6 per cent of purchases originated from the energy sector, which remains the main source of supply to the market. Improved energy sector performance over 2018 resulted in a 17.7 per cent increase in inflows relative to 2017.

Sales of foreign exchange to the public by authorised dealers amounted to US\$5.7 billion in 2018 (Table 15). The Retail and Distribution sector absorbed the largest share of all sales ${ }^{29}$ (31.8 per cent). Credit Cards ( 26.9 per cent),

[^12]Manufacturing (10.9 per cent), and Automobile Companies ( 6.5 per cent) made up the bulk of the remainder of foreign exchange sales. Central Bank's support to the market amounted to \$1.5
billion in 2017. The weighted average TTD/USD selling rate depreciated slightly from TT\$6.7817/ US\$1 in December 2017 to TT\$6.7861/US\$1 in December 2018.

* Includes purchases under the Foreign Exchange Liquidity Guarantee Facility, an additional source of liquidity which authorised dealers may utilise as a last resort.
r Revised.

Part X - Capital Market

## Equity Market

The domestic stock market improved during the second half of 2018 (Chart VI). The major Composite Price Index (CPI) grew by 5.4 per cent, with total market capitalization growing to $\$ 126.7$ billion. The expansion of the CPI was driven by a 21.8 per cent jump in the Cross Listed Index (CLI), stemming from share price increases in two major regional Banking and Non-Banking Finance sector stocks. On the other hand, the All T\&T Index (ATI) weighed on the CPI, registering a 1.4 per cent decline over the period. In comparison to regional exchanges, the Jamaica Stock Exchange (JSE) and Barbados Stock Exchange (BSE) recorded increases of 24.2 per cent and 15.5 per cent, respectively over July to December 2018.

Chart VI
Trinidad and Tobago Stock Indices

Source: Trinidad and Tobago Stock Exchange

Most of the sub-indices on the local exchange displayed negative movements over the six months ending December 2018 (Chart VII). These included the Trading (-0.4 per cent), NonBanking Finance ( -2.6 per cent), Property (-2.9 per cent), Energy ( -2.9 per cent), Conglomerates (-3.2 per cent), and Manufacturing II (-9.2 per cent) sub-indices. The Manufacturing II sub-
index continued to be weighed down by the deteriorating performance of Trinidad Cement Limited (TCL) in light of falling cement sales, economic pressures in the manufacturing sector, and competition from importers. The largest gain was observed in the Banking sub-index (12.0 per cent) on account of a 56.5 per cent increase in the share price of the regional NCB Financial Group Limited (NCBFG). The performance of NCBFG was attributed to higher financial year end profits and earnings per share, in addition to the successful settlement discussion and revised offer and take-over bid for Guardian Holdings Limited. The Manufacturing I sub index also improved over the period, expanding by 1.3 per cent.

Chart VII
Trinidad and Tobago Stock Market Sub-Indices (Julr 2018 - December, 2018)

Source: Trinidad and Tobago Stock Exchange

Trading of shares on the Trinidad adn Tobago Stock Exchange (TTSE) First Tier market over July to December 2018 was lower than the same period in 2017. The market observed 31.9 million shares being exchanged at $\$ 523.6$ million over the period, compared to 42.3 million shares at $\$ 567.0$ million in the same period in 2017.

## Bond Market

Provisional data suggests that activity on the primary debt market during the second half of 2018 was substantially larger compared to the same period in 2017 (Table 16). Over the period, there were 11 new primary placements totalling $\$ 8,374.3$ million compared to eight issues at $\$ 5,925.6$ million in 2017. The Central Government continued to be the dominant player in the market issuing five bonds totalling $\$ 2,790$ million. However, this was lower than the five issues totalling $\$ 5,175.6$ million in the same period in 2017. One state enterprise, the

p Provisional.

Urban Development Corporation of Trinidad and Tobago, financed two placements totalling \$876.8 million, while the National Investment Fund Holding Company Limited (NIFHCL) ${ }^{30}$ raised $\$ 4.0$ billion via three bonds in a public auction. Two private sector companies also engaged the bond market for a total of $\$ 530$ million over the period.

Trading activity on the secondary government bond market over July to December 2018 was substantially lower compared to the same period in 2017. Over the period, 42 trades occurred at a face value of roughly $\$ 194.0$ million. Comparatively, during the same period in 2017, the exchange witnessed 51 trades at a face value of $\$ 529.9$ million.

## Central Government Yield Curve \& Bond Index

Over the six months to December 2018, the Central Government yield curve displayed an upward trend, primarily among the short to medium term tenors (Chart IX). The short term 3 -month and 1 -year rates both increased by 10 basis points to 1.30 per cent and 2.75 per cent, respectively. On the longer end of the curve, the $10-y e a r ~ r a t e ~ g a i n e d ~ 5 ~ b a s i s ~ p o i n t s ~ t o ~ 4.42 ~ p e r ~$ cent while the 15-year rate remained unchanged at 5.10 per cent. During the same period, the Central Government Bond Price Index remained unchanged, while the Total Return Index, which includes coupon interest gains, grew by 3.2 per cent.

## Mutual Fund Industry

During the first three quarters of 2018, aggregate funds under management increased by 1.8 per cent to just under $\$ 44.0$ billion (Chart X) ${ }^{31,32}$. This was driven by a 12.0 per cent increase in Equity funds to $\$ 6,572.1$ million, and a 7.6 per cent increase in Money Market funds to
$\$ 9,007.3$ million by the end of September. On the other hand, Income funds and funds classified as 'Other'33 fell by 2.0 per cent to $\$ 28,035.7$ million and 2.7 per cent to $\$ 357.4$ million, respectively. In terms of denomination, TT dollar funds expanded by 2.7 per cent to $\$ 35,137.5$ million, while foreign currency funds declined by 1.7 per cent to a TT dollar equivalent of $\$ 8,834.9$ million.

[^13]In light of the improvement in aggregate funds under management, net sales within the industry increased by $\$ 1,108.4$ million over the first three quarters of 2018. Overall, the industry witnessed $\$ 13,653.9$ million in sales and $\$ 12,545.9$ million in redemptions. The total industry net sales position was driven by net sales in Income funds ( $\$ 541.3$ million), Money

Market funds (\$419.0 million), and Equity funds (TT\$254.6 million). Conversely, funds classified as 'Other' experienced $\$ 16.6$ million in net redemptions. In terms of currency profile, the increase in net sales comprised $\$ 959.6$ million in TT dollar funds, while the remaining TT\$148.7 million constituted foreign currency funds.

# Part XI - International Trade and Payments 

(Data in this section are in US dollars unless otherwise stated)

## Balance of Payments

The external accounts recorded an overall deficit of $\$ 351.0$ million ( 6.0 per cent of GDP) in the third quarter of 2018. At the end of September 2018, gross official reserves amounted to $\$ 7,465.3$ million or 8.1 months of prospective imports of goods and services. Notwithstanding a pickup in energy exports (year-on-year), the current account recorded a smaller surplus in the third quarter of 2018 as compared to the same period in 2017. Meanwhile, the financial account registered a net outflow due to movement in the direct and other investment accounts.

Preliminary data indicate that the current account surplus narrowed to $\$ 68.3$ million (1.2 per cent of GDP) in the three months to September 2018 (Table 17). Despite falling volumes of energy exports, an uptick in international commodity prices ${ }^{34}$ boosted energy exports earnings, pushing total exports up 8.7 per cent year-on-year to $\$ 2,486.3$ million. Latest data provided by energy companies suggest that energy export earnings increased by $\$ 276.9$ million and were underpinned by higher earnings from crude oil and refined products; LNG; natural gas liquids; and petrochemicals. However, non-energy exports ${ }^{35}$ declined by 19.0 per cent with reductions in the export of machinery and transport equipment; manufactured goods; beverages and tobacco; as well as food and live animals. Total imports rose by an estimated 12.3 per cent owing mainly to higher fuel imports. Similar to the case with energy exports, the increase in fuel imports was largely reflective of the rise in the global energy prices, as the volume of crude oil imports fell from 7.8 million barrels in the third quarter of 2017 to 7.2 million for the same period in 2018.

The services account deficit narrowed to $\$ 374.8$ million in the third quarter, reflective of an improvement in the other business services
account. Other business services recorded a smaller deficit in the third quarter of 2018 relative to the corresponding period in 2017 as domestic residents reduced their imports of technical and trade-related business services. The primary income account recorded a deficit of \$263.6 million in contrast to the surplus of $\$ 3.6$ million one year ago, and was due in large part to higher reinvested earnings and dividend payments by foreign-owned energy companies. A reduction in private-outbound transfers resulted in a higher surplus on the secondary income account.

In the third quarter of 2018, the financial account recorded a net outflow of $\$ 473.1$ million, a reversal of the net inflow of \$263.2 million registered in the corresponding period of 2017. Direct investment primarily contributed towards the overall net outflow on the financial account. In particular, direct investment liabilities (direct investment in Trinidad and Tobago by foreign investors) declined due to repayments on inter-company loans by resident enterprises. Partially offsetting this decline was an increase in reinvestment of earnings. These transactions were largely driven by the energy sector. Direct investment abroad registered an increase attributable to higher reinvestment of earnings and inter-company lending abroad. Financial flows on other investment recorded a net outflow of $\$ 104.7$ million. In particular, other investment liabilities registered a decline on account of lower accounts payable, loans and trade credits owed to non-residents. Meanwhile, other investment assets decreased as a result of a reduction in accounts receivable; currency and deposits; and trade credits owed to residents. Over the reference period, financial institutions increased their holdings of long-term debt securities abroad, largely contributing to the growth in portfolio assets.

Trinidad and Tobago's gross official reserves amounted to $\$ 7,575.0$ million at the end of

[^14]December 2018; $\$ 794.7$ million lower than the level recorded at the end of 2017. This portends an overall deficit on the external accounts. The level of reserves at the end of December 2018
represents 8.0 months of prospective imports of goods and services, compared to the import cover of 9.7 months at the end of $2017^{36}$.

Wte. This table is an aly ytical presentation of the Balance of Payments and is presented in accordance with the IMF's Balance of Payments and International Investment Position Manual Sixth Edition (BPM6). Refer to Box 3 of the Economic Bulletin,March 2017 for a Technical Note on the Transition to BPM6.
The following financial account movements are represented with a negative sign:

- A decrease in assets (inflow)
- A decrease in liabilities (outtlow)

The following financial account movements are represented with a positive sign:

- An increase in assets (outflow)
- An increase in liabilities (inflow)
- A net outflow in net balances
* Energy goods data for 2016-2018 comprise estimates by the Central Bank of Trinidad and Tobago.
** IExports and imports are reported on a FOB (Free on Board) basis.
*** Includes petroleum, petroleum products and related materials. Energy exports include exports of petroleum, petroleum products and related materials and the exports of petrochemicals.
**** Other investment comprise currency and deposits, loans, trade credit and advances, other accounts receivable/payable and special drawing rights (liabilities).
End of Period.

[^15]
## International Investment Position

The net international investment position (IIP) was estimated at $\$ 4,105.1$ million at the end of September 2018. This reflects an increase of $\$ 152.5$ million from the position registered at the end of the second quarter of 2018 . The movement resulted from a reduction of $\$ 828.2$ million in the stock of liabilities which more than outweighed a decrease of $\$ 675.7$ million in the stock of assets (Table 18).

The decline in the stock of assets was primarily influenced by decreases in other investment assets and reserve assets over the review period. In this vein, the reduction in the stock of other investment assets was primarily due to payments received on accounts receivable. In addition,
currency and deposits held abroad recorded a drawdown over the review period. Meanwhile, the decrease in reserve assets stemmed from intervention operations in the domestic foreign exchange market by the Central Bank of Trinidad and Tobago. Movement in the stock of liabilities was primarily due to other investment liabilities. Decreases in other investment liabilities were attributable to lower accounts payable, loans and trade credits owed to non-residents by domestic entities. Direct investment liabilities also declined, reflecting payments on inter-company loans. Partially offsetting this reduction was an increase in equity capital, primarily on account of reinvested earnings by energy companies.

[^16]
## Effective Exchange Rates

Trinidad and Tobago's international price competitiveness, as measured by the trade weighted real effective exchange rate (TWREER) ${ }^{37}$, improved by 2.6 per cent year-on-year in the first eleven months of 2018. To a large extent, movement in the TWREER was reflective of a widening in the inflation differential between Trinidad and Tobago and its major trading partners, as measured by the effective inflation rate (EIR). The trade weighted nominal effective exchange rate (TWNEER) depreciated by 0.5 per cent while the EIR declined by 2.1 per cent. Over the first eleven months of 2018, the domestic economy's inflation rate averaged 1.0 per cent, which was lower than the weighted average inflation rate of the country's major trading partners (3.3 per cent). Overall, the combination of the depreciation in the TWNEER and lower domestic inflation rate would imply that Trinidad and Tobago's exports were more price competitive in some markets (Chart XI).

SOURCE: Central Statistical Office.
1 Annual data represents year-on-year changes; quarterly data refer to quarter-on-quarter changes.
2 Energy refers to petrochemicals, oil and natural gas exploration, production and refining and related products.

## SOURCES: Ministry of Finance and Central Bank of Trinidad and Tobago.

N.B. Figures may not sum due to rounding.

1 Refers to accounts of the Consolidated Fund, Unemployment Fund, Road Improvement Fund, the Infrastructure Development Fund and Heritage and Stabilization Fund
2 This is a balancing item and includes errors and omissions, advances from the Central Bank and drawdowns from the treasury deposit accounts. Negative balances represent an increase in deposits at the Central Bank.
 and Profits includes taxes paid by petrochemical companies while Non-Energy Revenue: Taxes on Income and Profits does not.

1 To maintain consistency, the Gross Domestic Budget Deficit is computed as Domestic Expenditure minus Domestic Revenue.
2 Domestic Revenue = Total Revenue - Energy Revenue.

SOURCES: Ministry of Finance and Central Bank of Trinidad and Tobago.
1 Includes Treasury Bills as well as Debt Management Bills \& Treasury Notes.
2 Also includes bonds exchanged for units in the CLICO Investment Fund (CIF) since these represent a reduction in the outstanding balance.
3 Comprises Central Bank fixed-interest rate bonds as well as National tax-free saving bonds and Public sector arrears.

SOURCE: Central Bank of Trinidad and Tobago.
1 Represents total demand, savings and time deposits, short-term credit instruments with a maturity up to and including one year and all fund raising instruments maturing within or beyond one year of the reporting date
These are all denominated in local currency and are adjusted for inter-bank and intra-bank cheques and other items credited to the banks on the books of the Central Bank.
2 This includes the total of required and any excess reserves.
3 Represents the excess/shortage as an average through the month. Annual data reflect an average of the 12 monthly averages

SOURCE: Central Bank of Trinidad and Tobago.
1 Annual data refer to the quarterly averages for the respective year and quarterly rates are end of period rates.
2 The data are weighted averages unless otherwise stated.
3 See article on the 'The Floating Exchange Rate - Some Statistical Issues' Quarterly Economic Bulletin, Dec. 1993.
4 Includes Finance Companies, Merchant Banks, Trust \& Mortgage Finance Companies. Data represents rates for reporting institutions only
5 Quarterly T-Bill data represent the end-of-period 3-month rates.
6 Quarterly data are simple averages of the monthly rates on new loans. See article in Economic Bulletin - January 2011 'Weighted Average Interest Rates on New Loans'.

APPENDIX II

Calendar of Key Economic Events<br>Juir - December, 2018

3 One cent coins issued by the Central Bank of Trinidad and Tobago ceased to be legal tender for cash payments. (Legal Notice No. 35 of 2018)

Republic Bank of Trinidad and Tobago increased its Prime Lending Rate to $9.75 \%$ from 9.5\%.

BHP Billiton announced the discovery of new gas in its Victoria-1 well off the East coast of Trinidad. Victoria-1 is one of three wells planned as part of the company's phase 2 drilling campaign in Trinidad and Toboag. The Victoria-1 well has been estimated to hold 4-5 trillion cubic feet of gas.

## August

BP Trinidad and Tobago announced the arrival of its Angelin platform in Trinidad and Tobago. The facility will include four wells and have a production capacity of approximately 600 million standard cubic feet a day (mmscfd). First gas is expected in the first quarter of 2019

RBC Royal Bank of Canada increased its Prime Lending Rate from $9.0 \%$ to $9.25 \%$.

Shell Trinidad and Tobago announced the discovery of gas from its first well in its Dolphin Extension Campaign. This new development will have three production wells when completed.

The National Gas Company of Trinidad and Tobago (NGC) signed a Gas Sales Agreement with DeNovo Energy Limited for the sale of natural gas to the NGC from DeNovo's Iguana field in Block 1(a)
(offshore Trinidad's west coast). DeNovo is the first local upstream company to operate an offshore gas field.

## September

4 National Investment Fund (NIF) Bonds were listed and traded on the Trinidad and Tobago Stock Exchange's Corporate Bond Market. The NIF is a company established by the Government of the Republic of Trinidad and Tobago (GORTT) for holding and monetizing government assets which were received as repayment of the debt due to the GORTT by Clico and CIB. The offering opened on July 12 and closed on August 12, 2018 and was oversubscribed by $\$ 3.3$ billion or 82 per cent. The total value of the NIF offer was $\$ 4$ billion.

18 The Mortgage Market Reference Rate (MMRR) remained at 3.00 per cent.

The Central Bank of Trinidad and Tobago maintained the Repo Rate at 5.00 per cent.

## November

30 State-owned Petroleum Company of Trinidad and Tobago (Petrotrin) ceased operations. The company's assets were transferred into several new companies: Heritage Petroleum Company Ltd (exploration and production), Paria Fuel Trading (trading and marketing) and Guaracara Refining Company (refinery assets). These new companies will be under the umbrella of a holding company known as Trinidad Petroleum Holdings Ltd.

December

13 The Government of Trinidad and Tobago increased its shareholding in the Corporacion Andina de Formento (CAF) by US $\$ 190,010,200$ ( 13,381 shares) when it signed the Agreement for the Common Capital Shares at the $164^{\text {th }}$ Board of Directors Meeting of CAF in Uruguay. To date, Trinidad and Tobago has invested US $\$ 519$ million in CAF.

14 An agreement was signed between the Government of Trinidad and Tobago and British Petroleum Trinidad and Tobago (bpTT) to extend the South East Galeota Exploration \& Production licence, and to begin the offshore investments of the Cassia Compression Project and the Matapal Gas Project. The energy company will invest some US $\$ 1.8$ billion in these new projects.

[^5]:    12 The amount of slack in the labour market is essentially a measure of the quantity of unemployed resources; it represents the quantity of labour that could be employed productively, but is idle. Researchers use several different proxy measures of labour market slack based on macroeconomic data such as suppressed real wage levels and decreased numbers of advertised job vacancies (or a decreasing ratio of vacancies to unemployed persons).
    ${ }^{13}$ This indicator for job separation is limited insofar as it only includes registered retrenchment notices, and does not capture other forms of job separation. Retrenchment refers to the termination of employment of a worker at the initiative of an employer for the reason of redundancy according to the Retrenchment and Severance Benefits Act (No. 32 of 1985). The Act states that, "where an employer proposes to terminate the services of five or more workers for the reason of redundancy he shall give formal notice of termination in writing to each involved worker, to the recognised majority union and to the Minister of Labour". As such, if fewer than five employees are retrenched, employers are not obligated to report to the Ministry.
    14 This indicator is constructed by the Central Bank using the number of employment vacancies advertised in the Daily Express, Newsday, and Trinidad Guardian newspapers.
    15 The Index of Productivity comprises data for the following industries: Manufacturing, Electricity, Water, and Energy (crude oil, natural gas, and petrochemicals). It is calculated as the ratio of the Index of Domestic Production to the Index of Hours Worked.

[^6]:    ${ }^{16}$ See Part IV - Domestic Economic Activity.
    ${ }^{17}$ The Index of Average Weekly Earnings, which is computed by the Central Statistical Office, is based on surveyed companies' employment and wage bill. The average weekly earnings is calculated as the earnings (total amount paid to employees) divided by the number of employees.

[^7]:    ${ }^{18}$ Refers to the Housing, Electricity, Gas and other Fuels sub-index.
    ${ }^{19}$ Refers to the Furnishings, Household Equipment and Routine Maintenance sub-index.
    ${ }^{20}$ Not Elsewhere Classified.
    ${ }^{21}$ Producer price indices show the rate of change in prices producers receive for their goods before the goods are sold at the retail level.

[^8]:    22 See Part VI - Domestic Prices.

[^9]:    ${ }^{23}$ PETROTRIN ended its refinery operations on November 30, 2018. Several companies were established to continue other key business processes. These include the Heritage Petroleum Company (responsible for exploration and production), and Paria Fuel Trading Company (responsible for terminalling and storage).
    ${ }^{24}$ As at the end of November 2018, the Central Government borrowed a total of US $\$ 600.0$ million from the CAF development bank. Since becoming a member of CAF in 1994, Trinidad and Tobago has increased its shareholding to US\$519.0 million with the most recent addition being a US $\$ 190.0$ million investment made on December 3, 2018. The increased shareholding has also increased the amount of financing that Trinidad and Tobago can access from CAF.

[^10]:    Sources: Ministry of Finance and Central Bank of Trinidad and Tobago

[^11]:    ${ }^{25}$ Excess liquidity refers to commercial banks' holdings of reserves at the Central Bank in excess of the statutory requirement.
    ${ }^{26}$ Net domestic fiscal infections refer to the excess of government domestic expenditure over domestic revenue.
    ${ }^{27}$ See Part X - Capital Markets

[^12]:    28 A broader measure of money and includes M-1A plus savings and time deposits.
    29 Refers to transactions of US $\$ 20,000$ or more.

[^13]:    30 The National Investment Fund Holding Company (NIFHCL), incorporated on $29^{\text {th }}$ May 2018, was established for the purpose of holding and monetizing government assets which were received as repayment of the debt due to the Government by CLICO and CIB.
    ${ }^{31}$ Aggregate funds under management refer to mutual fund information collected by the Central Bank of Trinidad and Tobago, including funds managed by the Trinidad and Tobago Unit Trust Corporation, Royal Bank Trinidad and Tobago, Republic Bank Limited and First Citizens Bank Limited.
    32 In September 2018, a re-classification of the fund types was conducted to more accurately represent industry characteristics.
    ${ }_{33}$ Funds classified as 'Other' represent high yield funds and retirement funds.

[^14]:    ${ }^{34}$ See Part III - International Commodity Prices.
    ${ }^{35}$ Non-energy exports data were obtained from the Central Statistical Office.

[^15]:    ${ }^{36}$ Gross official reserves amounted to $\$ 8,369.8$ million at the end of 2017.
