JUNE 2026

Central Bank of Trinidad and Tobago

Economic DataPack

June 2026

The Central Bank of Trinidad and Tobago monitors domestic and international developments to fulfil its functions related to monetary policy, financial stability, foreign exchange management, and economic intelligence. The data contained in this report support these functions. It covers all the major sectors and presents data at all frequencies as available. The DataPack is accessible as part of our routine reports and will be available on a quarterly basis on the last working day of the quarter. For additional data and a longer time series, please visit the Central Bank's Data Centre: <https://www.central-bank.org.tt/statistics/data-centre/>. The Central Bank looks forward to comments and feedback at info@central-bank.org.tt.

END NOTES

SUMMARY OF ECONOMIC AND FINANCIAL INDICATORS

- 1 Real GDP growth are sourced from the Central Statistical Office (CSO). The CSO has changed the base year to 2012 and the industry breakdown now conforms to the International Standard Industrial Classification of All Economic Activities, Revision 4 (ISIC, Rev 4) which is different to the previous industry breakdown.
- 2 Price converted from Pence Sterling per therm to US\$ per mmbtu.
- 3 Energy goods data comprise estimates by the Central Bank of Trinidad and Tobago.
- 4 Exports and imports are reported on a FOB (Free on Board) basis.
- 5 International reserves have been revised to include Trinidad and Tobago's reserve position in the IMF. International reserves are defined as external assets that are readily available to and controlled by monetary authorities for direct financing of payments imbalances, for indirectly regulating magnitudes of such imbalances through intervention in exchange markets and for other purposes. Typically, they include a country's holding of foreign currency deposits, securities, gold, Special Drawing Rights (SDRs), reserve position in the IMF and other claims (Balance of Payments Manual 6th Edition, Paragraph 6.64).
- 6 In May 2026, the Bank revised its forecasts for imports of good and services, thereby leading to revisions in the import cover. Please refer to the Technical Note on Page 24 - Import Cover Revisions - for further information.
- 7 Quarterly data for the period is not cumulative.
- 8 Excludes debt issued for sterilisation and self-serviced guaranteed debt of public entities.
- 9 The primary reserve requirement of commercial banks was reduced from 14.0 per cent to 10.0 per cent of prescribed liabilities with effect from the reserve week beginning July 24, 2024.
- 10 The Residential Real Estate Mortgage Market Guideline sets the framework for transparency in mortgage loans' terms and conditions by commercial banks in Trinidad and Tobago and incorporates a Mortgage Market Reference Rate (MMRR) that commercial banks may choose to utilise as a base rate for setting their adjustable mortgage rates. The MMRR is not a policy rate but is calculated utilising information on the system cost of funds and the 15-year Treasury bond yield. The published MMRR rates are rounded to the nearest 25 bps. In 2017 an adjustment was made to the weighting structure to 50:50 between the cost of funds of the banking system and the 15-year Treasury rate from 40:60 ratio (MMRR Guideline June 1, 2017). From the period September 2020 the MMRR was held constant at 3.00 per cent while the Central Bank undertook an in-depth assessment of the operational aspects of its calculation. In September 2021, in the context of the financial situation brought about by the COVID-19 pandemic, the Central Bank and commercial banks agreed to maintain the MMRR at the then-existing level (3.00 per cent) for a 2-year period.
- 11 In light of the suspension of the MMRR since September 2021, the MMRR for December 2023 reflects the rate as at September 2021 (3.00 per cent). As a result, changes in the components (system cost of funds and 15-year Treasury rate) which occurred during the period of suspension shall not be reflected in the determination of the MMRR for December 2023 and thereafter (MMRR Update February 29, 2024).
- 12 Excludes bonds issued on the international capital market.

REAL SECTOR

- 1 The Bank compiles a Quarterly Index of Real Economic Activity (QIEA) to gauge short-term economic activity. The industry classification conforms to the International Standard Industrial Classification, Revision 4 (ISIC Rev.4). The Central Statistical Office (CSO) is the official source of GDP data in Trinidad and Tobago. The QIEA differs from the CSO's measure of GDP in terms of methodologies and coverage. The QIEA is based on production indicators, excludes price effects and does not comprehensively cover all sub-industries measured by the CSO. In 2019, the QIEA was rebased from a 2010 to 2012 base year and the classification system was migrated from the Trinidad and Tobago System of National Accounts to the International Standard Industrial Classification, Revision 4. Under this classification, the production of petrochemicals, LNG and NGLs are included in manufacturing, while the output of crude oil and natural gas are included in mining and quarrying. The retail sale of automotive fuels is now part of wholesale and retail trade. For comparison purposes, the sectoral breakdown presented previously is maintained in this table. Manufacturing as presented here excludes the production of petrochemicals, LNG and NGLs, while distribution excludes the retail sale of automotive fuels.
- 2 Manufacturing excludes the output of Petrochemicals, Liquefied Natural Gas and Natural Gas Liquids.
- 3 Weighted Index of Cashless transactions (ATM, Internet, Telephone, RTGS and ACH transactions, and paper-based transfers). Increases in the volume of payment activity from Cheques and Cashless Payments should indicate increases in Non-Energy sector activity.
- 4 Twenty Foot Equivalent Units (full units only) from the Port of Port of Spain. Excludes containers from Point Lisas Industrial Port Development Corporation Limited.
- 5 Includes expenditure from the Infrastructure Development Fund.
- 6 Average prices for the period.
- 7 Price converted from Pence Sterling per therm to US\$ per mmbtu.
- 8 The Central Bank rebased the ECPI in 2024 using a new base period of Q3 2023 compared to the previous base period of January 2007 (a Technical Note on the rebasing was published in the Annual Economic Survey 2024).
- 9 Includes Propane, Butane and Natural Gasoline.
- 10 Includes Other Mining and Quarrying.
- 11 Includes Transport, Storage & Communication and all other services.

PUBLIC FINANCE

- 1 GDP data used for ratios prior to FY2025 are sourced from the CSO; data for FY2025 are Central Bank estimates.
- 2 Adjusted for transfers to the Infrastructure Development Fund, Government Assisted Tertiary Education Fund and CARICOM Petroleum Fund.
- 3 The non-energy primary balance measures a government's ability to pay for public goods and services using only its non-resource generated revenues. It also highlights the cyclical nature of fiscal policy by excluding energy revenues which are subject to fluctuations in international commodity prices.
- 4 Comprise Treasury Bills and Treasury Notes issued for Open Market Operations (OMOs) and Treasury Bonds issued for liquidity management.
- 5 Excludes debt issued for sterilisation purposes.
- 6 Includes Central Government Domestic Loans.
- 7 Refers to bonds issued by the Government for the settlement of VAT refunds owed to businesses in Trinidad and Tobago.
- 8 Comprises outstanding balances of national tax-free saving bonds, public sector arrears and Central Bank fixed-rate bonds.
- 9 Refers to Government-guaranteed debt of public entities that are directly serviced by the Central Government.
- 10 Debt ratios prior to FY2025 are based on nominal GDP from the Central Statistical Office (CSO) converted into fiscal years. Ratios for FY2025 are based on nominal GDP estimates from the Central Bank.

MONETARY AND FINANCIAL SECTOR

- 1 Represents total demand, savings and time deposits, short-term credit instruments with a maturity up to and including one year and all fund raising instruments maturing within or beyond one year of the reporting date. These are all denominated in local currency and are adjusted for inter-bank and intra-bank cheques and other items credited to the banks on the books of the Central Bank.
- 2 The cash reserves requirement was reduced from 14.0 per cent to 10.0 per cent effective July 24, 2024. This represented the first reduction since March 2020.
- 3 Includes the total of required and any excess reserves.
- 4 Represents the excess/shortage as at the end of the month.
- 5 Include sales under the Foreign Exchange Liquidity Guarantee Facility.
- 6 Include Government Bond issues for liquidity absorption purposes.
- 7 Dashes indicate no interbank activity during the period.
- 8 The Residential Real Estate Mortgage Market Guideline sets the framework for transparency in mortgage loans' terms and conditions by commercial banks in Trinidad and Tobago and incorporates a Mortgage Market Reference Rate (MMRR) that commercial banks may choose to utilise as a base rate for setting their adjustable mortgage rates. The MMRR is not a policy rate but is calculated utilising information on the system cost of funds and the 15-year Treasury bond yield. The published MMRR rates are rounded to the nearest 25 bps. In 2017 an adjustment was made to the weighting structure to 50:50 between the cost of funds of the banking system and the 15-year Treasury rate from 40:60 ratio (MMRR Guideline June 1, 2017). From the period September 2020 the MMRR was held constant at 3.00 per cent while the Central Bank undertook an in-depth assessment of the operational aspects of its calculation. In September 2021, in the context of the financial situation brought about by the COVID-19 pandemic, the Central Bank and commercial banks agreed to maintain the MMRR at the then-existing level (3.00 per cent) for a two-year period.
- 9 In light of the suspension of the MMRR since September 2021, the MMRR for December 2023 reflects the rate as at September 2021 (3.00 per cent). As a result, changes in the components (system cost of funds and 15-year Treasury rate) which occurred during the period of suspension shall not be reflected in the determination of the MMRR for December 2023 and thereafter (MMRR Update February 29, 2024).
- 10 Narrow Money Supply (M-1A) is defined as currency in active circulation plus demand deposits (adjusted) of commercial banks.
- 11 Broad Money Supply (M2) is defined as the Narrow Money Supply plus Savings Deposits (adjusted) and Time Deposits (adjusted) of commercial banks.
- 12 Broad Money Supply (M2*) is defined as Broad Money (M-2) plus the foreign currency deposits of residents in local commercial banks.
- 13 Broad Money Supply (M3) includes broad money supply M2, plus savings deposits (adjusted) and Time Deposits (adjusted) of non-bank financial institutions.
- 14 Broad Money Supply (M3*) includes M3 plus the foreign currency deposits of non-bank financial institutions.
- 15 Includes bonds issued on both the domestic and international capital markets.
- 16 Data refer to the double transactions of buying and selling.
- 17 Trading in Government securities and Treasury Bills was conducted under the aegis of the Investment Division, Central Bank of Trinidad and Tobago. From 1993 trading in Government securities has been conducted by the Stock Exchange of Trinidad and Tobago.

EXTERNAL SECTOR

- 1 This table is an analytical presentation of the Balance of Payments and is presented in accordance with the IMF's Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6).
The following financial account movements are represented with a negative sign:
 - A decrease in assets (inflow)
 - A decrease in liabilities (outflow)
 - A net inflow in net balances
 The following financial account movements are represented with a positive sign:
 - An increase in assets (outflow)
 - An increase in liabilities (inflow)
 - A net outflow in net balances
- 2 Totals may not sum due to rounding.
- 3 Energy goods data comprise estimates by the Central Bank of Trinidad and Tobago.
- 4 Exports and imports are reported on a FOB (Free on Board) basis. Energy exports include exports of petroleum, petroleum products and related materials and the exports of petrochemicals.
- 5 Includes petroleum, petroleum products and related materials.
- 6 Other investment comprise currency and deposits, loans, insurance, pension, and standardised guarantee schemes, trade credit and advances, other accounts receivable/payable and special drawing rights (liabilities).
- 7 GDP data prior to 2025 are sourced from the Central Statistical Office (CSO). GDP data for 2025 are Central Bank estimates.
- 8 The International Investment Position (IIP) is a statistical statement that shows at a point in time the value and composition of financial assets of residents of an economy (claims on non-residents) including reserve assets, and liabilities of residents of an economy to non-residents.
- 9 Other investment comprise currency and deposits, loans, insurance, pension, and standardised guarantee schemes, trade credit and advances, other accounts receivable/payable and special drawing rights (liabilities).
- 10 Reserve assets comprises monetary gold, special drawing rights, foreign exchange and Trinidad and Tobago's reserve position with the IMF.
- 11 Includes all external debt liabilities of the public and private sectors inclusive of intercompany lending. Public sector comprises Central Government, Central Bank and all other public sector entities (guaranteed and non-guaranteed). The private sector comprises entities operating within the energy sector, as well as the non-energy sector such as manufacturing, construction, distribution, finance, insurance and real estate. It includes all entities surveyed by the Bank for the compilation of external sector statistics. A significant portion of private sector external debt represents intercompany lending by energy companies.
- 12 Refers to debt liabilities stemming from transactions between affiliated enterprises.
- 13 Comprises of the following Petroleum sub-industries: mining, exploration and production, refineries, petrochemicals, service contractors and marketing and distribution.
- 14 Positive changes reflect loss of competitiveness.
- 15 With effect from January 1993, the valuation of Central Bank liabilities under the Use of Funds Credit is based on the current SDR/US market exchange rates. Previously, this valuation was calculated as a constant accounting rate of SDR 1 = US\$ 1.30.
- 16 Exclusive of the Heritage and Stabilisation Fund.
- 17 Equals Central Bank Foreign Assets minus Central Bank Foreign Liabilities.
- 18 Equals Net International Reserves plus Central Government Assets.
- 19 In May 2026, the Bank revised its forecasts for imports of good and services, thereby leading to revisions in the import cover. Please refer to the Technical Note on Page 24 - Import Cover Revisions - for further information.

NOTE: Detailed definitions of key economic terms can be found in the Glossary of Terms on the Central Bank's website:
<https://www.central-bank.org.tt/statistics/data-center-glossary-of-terms/>

Technical Note: Import Cover Revisions

The Import Cover (IC) shows a country’s stock of foreign reserves expressed in terms of the number of months of prospective imports of goods and services it can sustain. It is a critical measure of a country’s economic health as it indicates a country’s ability to withstand external shocks. The higher the ratio, the better the country’s ability to pay for its imports and maintain its trade balance and a stable currency. It is derived using the following calculation:

$$IC = \frac{\text{Gross Official Reserves}}{\text{Prospective Imports of Goods and Services}} \times 12$$

Reserves are defined as external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (International Monetary Fund, Balance of Payments and International Investment Position Manual, Sixth Edition, paragraph 6.64). Prospective imports represent imports of goods and services projected for the 12 months following the relevant time period. Prospective imports are usually updated once a year to incorporate changes in economic conditions. Updated prospective imports lead to revisions in the IC.

In May 2026, the Bank revised its forecasts for imports of good and services, thereby leading to revisions in the IC. The upward revision resulted from growth in non-energy imports, reflecting the continued expansion in domestic economic activity and ongoing projects, particularly by multinational energy companies, which are expected to stimulate capital imports.

Table 1 – Net Official Reserves and Import Cover for Selected Months

	Jan-26	Feb-26	Mar-26	Apr-26	May-26
Net Official Reserves (US\$ Millions)	5,715.7	5,580.0	5,357.8	5,418.3	5,241.9
Import Cover (Months)	6.5 ^r	6.4 ^r	6.2	6.2	6.0
